VOL. 11

1913

The

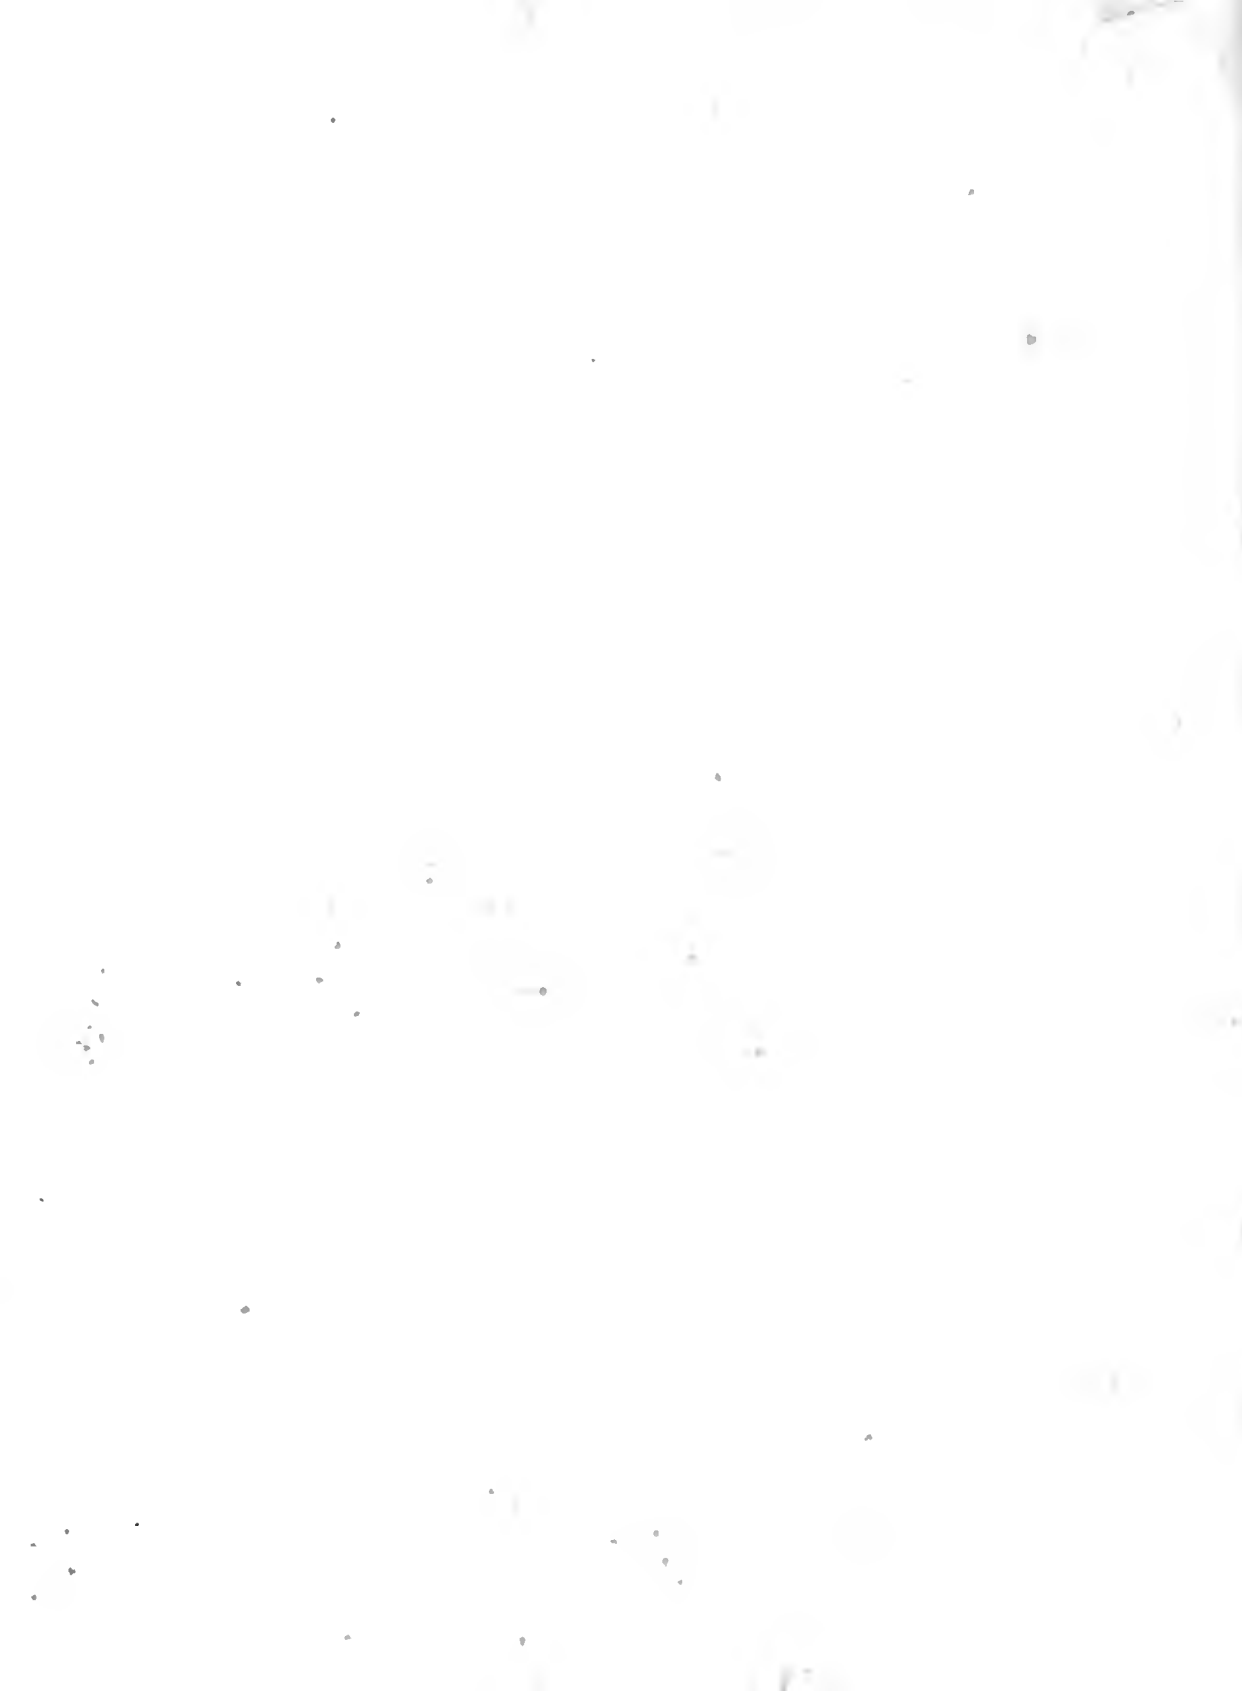

Alumni

PUBLISHED ANNUALLY
BY THE MEMBERS OF
THE SENIOR CLASS

North Carolina College
of Agriculture and
Mechanic Arts

WEST RALEIGH, N. C.

To

Captain Willis Grandy Peace, C.A.C.

Professor of Military Science and Tactics

As a slight mark of esteem and respect of the Corps of Cadets,

this the eleventh volume of THE AGROMECK

is respectfully dedicated by the

Class of 1913

Captain Willis Grandy Peace

Captain Peace was born at Oxford, North Carolina, September 21, 1875. After preparatory training at Horner Military School, Oxford, he entered the University of North Carolina with the Class of 1898. Here he attained *Cum laude*, but did not graduate, leaving to enter United States Military Academy, West Point, where he graduated in 1901. Immediately commissioned Second Lieutenant of Artillery he was raised to the rank of First Lieutenant in 1905, and of Captain in 1909.

Captain Peace's principal service has been with the Fifth and Fourteenth Companies of Coast Artillery, on Tybee Island, Georgia, in defense of the Savannah River; with the Sixteenth Company, in defense of Port Royal, South Carolina; with the One Hundred and Fifth Company, in defense of San Francisco Harbor; with the Twenty-fourth Battery of Field Artillery when it was sent out to quiet disturbances in China. Order was restored before the arrival of the troops, however, and the battery was kept in the Philippines. His next service was with the One Hundred and Twenty-third and Ninety-eighth Companies in defense of New York Harbor, and in making military maps in Southern California. Since July, 1910, Captain Peace has been Commandant of Cadets and Professor of Military Science and Tactics at the North Carolina College of Agriculture and Mechanic Arts.

Captain Peace was married in 1906, in San Francisco, to Miss Dorothy Bruce Dustan.

He is a member of the Sigma Chi Fraternity, of the Sons of the Revolution, of the Capital Club of Raleigh, and of the Raleigh Country Club.

During his residence at his present post Captain Peace has commanded the respect of the Faculty of the College, and of the students, by the efficient and conscientious manner in which he has discharged his duties; and that he has won the esteem and the affection of all with whom he has come in contact is evinced by the dedication to him of this Annual.

T. P. HARRISON.

*To those who appreciate the difficulties
of producing a College Annual
we extend our hearty*

Greeting

*in this, the eleventh volume
of
THE AGROMECK*

Editorial

In this book we have tried to summarize our work and pleasures of the past year. For the students, we trust that we have stored up some incident that one day will bring back sweet memories of school days. For the Alumni, this book is intended as proof of our loyalty to the College traditions which we have inherited from them and with the hope of reviving in them those sacred immutable memories that are associated with their past college life. For the public it is intended as a demonstration of close ties of comradeship that unite all A & M men in their enthusiasm for their Alma Mater.

Faculty

DANIEL HARVEY HILL, A.M., LL.D.

President

A.B., Davidson College, '80-'86; Lit D., '05; University of North Carolina, '10; Professor of English, Georgia Military and Agricultural College, '80-'89; Professor of English, N. C. A & M, '89-'08; Vice-President, '05-'08; President, '08—

WALLACE CARL RIDDICK, A.B., C.E.

Vice-President and Professor of Civil Engineering

A.B., University of North Carolina, '85; C.E., Lehigh, '90; Engineer, Roanoke (Virginia) Water and Power Company, '90-'92; Professor of Mathematics and Civil Engineering, N. C. A & M College, '92-'95; Professor of Civil Engineering, '05; Vice-President, '08—

WILLIAM ALPHONSO WITHERS, A.M.

Professor of Chemistry

A.B., Davidson College, '83; Postgraduate Student, Cornell, '88-'90; Fellow, '89-'90; Elected to Sigma Xi; Assistant Chemist, N. C. Experiment Station, '84-'88; Chemist, '97; Acting Director, '97-'98; State Chemist, N. C. '97-'98; Professor of Chemistry, N. C. A & M, '89—; Member Executive Committee, Pure Food and Drug Congress, '98; Vice-President, American Chemical Society, '01-'02; Fellow, American Association for the Advancement of Science; President, American Association of Official Agricultural Chemists, '09-'10; Author N. C. Pure Food Law, '99.

ROBERT E. LEE YATES, A.M.

Professor of Mathematics

A.M., Wake Forest College, '88; Adjunct-Professor of Mathematics, N. C. A & M, '91-'05; Student in Higher Mathematics, Chicago University, '05-'06; Professor of Pure Mathematics, N. C. A & M, '06

THOMAS NELSON

Professor of Textile Industry

Diploma, Cotton Manufacturing, Harris Institute, Textile School of Preston, Lancashire, England, 1910; Special Designing and Cloth Analysis Course, Lowell Textile School, 1898; Certificate, Weaving and Designing City and Guilds of London Institute; Private Pupil in Designing and Mill Management of Mr. John Fish; Manager of Queens Mill, Preston, Eng.; Experience in English, Northern and Southern Mills; Member of American Textile Association and Author of Technical Books and Textile Journal Correspondent; Instructor in Warp Preparation and Power Loom Weaving, Lowell Textile School, Mass., '00; Instructor in Weaving and Designing, N. C. A & M, '01-'06; Professor of Textile Industry, '06—

CLIFFORD LEWIS NEWMAN

Professor of Agriculture

B.S., A & M of Alabama, '86; M.S., '87; Assistant Professor of Agriculture, University of Tennessee, '87-'89; Principal of Athens (Alabama) Agricultural School, '89-'91; Assistant Agri-

culturist, Arkansas Experiment Station, '91-'97; Professor of Agriculture, University of Arkansas, '97-'05; Professor of Agronomy, Clemson College, S. C., '05-'08; Professor of Agriculture, N. C. A & M, '08—

WILLIAM HAND BROWNE, JR., A.B.

Professor of Physics and Electrical Engineering

A.B., John Hopkins, '90; Practical Engineer, '90-'96; Instructor of Electrical Engineering, University of Nebraska, '96-'98; Assistant Professor of Electrical Engineering, University of Illinois, '98-'02; Technical Editor, *Electrical Review*, '02-'08; Professor of Physics and Electrical Engineering, N. C. A & M, '08—

HOWARD ERNEST SATTERFIELD, M.E.

Professor of Mechanical Engineering

B.S. in M.E., Purdue University, '04; M.E., '09; Professor of Mechanical Engineering, N. C. A & M, '08—

THOMAS PERRIN HARRISON, PH.D.

Dean and Professor of English

B.S., South Carolina Military Academy, '86; Instructor, South Carolina Military Academy, '86-'88; Ph.D., Johns Hopkins University, '91; Associate Professor of English, Clemson College, S. C., '91-'96; Professor of English, Davidson College, N. C., '96-'08; Professor of English, N. C. A & M, '08—

GUY ALEXANDER ROBERTS, B.S., D.V.S.

Professor of Veterinary Science and Physiology

B.Agr., University of Missouri, '99; D.V.S., Kansas City Veterinary College, '03; Assistant North Carolina Veterinarian, '03-'07; Instructor in Veterinary Science and Physiology, N. C. A & M, '03-'05; Assistant Professor, '05-'06; Associate Professor, '06-'08; Professor, '08—

IRA OBEN SCHAUB, B.S.

Professor of Agriculture Extension

B.S., N. C. A & M, '00; Postgraduate, Johns Hopkins, '00-'03; Assistant Chemist, Experiment Station University of Illinois, '03-'05; Assistant Professor of Soils, Iowa State College, '05-'09; Professor of Agriculture Extension, N. C. A & M, '10—

WILLIS GRANDY PEACE, CAPTAIN, U. S. A.

Professor of Military Science and Tactics

West Point, Class of 1901; Fort Fremont, S. C., in defense of Port Royal and Beaufort, '01-'02; Fort Stevens, Ga., in defense of San Francisco, '04-'05; San Diego, Cal., at work on the Progressive Military Map of the U. S., '05-'06; with Thirteenth Field Battery, Philippine Islands, '05-'07; Fort Hamilton, N. Y., in defense of New York Harbor, '07-'10; Professor of Military Science and Tactics, N. C. A & M, '10—

JOHN CHESTER MCNUTT, B.S.AGR.

Professor of Animal Husbandry and Dairying

B.S.Agr., Ohio State University, '07; Superintendent, Hartman Stock Farm, of Columbus, O., '07-'08; Assistant in Animal Husbandry, New Hampshire State College, '08-'09; Assistant Professor, '09-'10; Associate Professor, '10; Professor of Animal Husbandry and Dairying, N. C. A & M, '10—

HARRY RASCOE FULTON, M.A.

Professor of Botany and Vegetable Pathology

A.B., University of Mississippi, 1900; A.M., University of Missouri, 1905; A.M., Harvard University, '06; Instructor in Biology, University of Mississippi, '03-'04; Plant Pathologist, Louisiana Experiment Stations, '06-'08; Assistant and Associate Professor of Botany, The Pennsylvania State College, '08-'12; Professor of Botany, N. C. A & M, '12—; Fellow in the American Association for the Advancement of Science; Member of the American Physiopathological Society; of Sigma Xi Scientific Society; of Phi Kappa Phi Honor Society; of Delta Psi Fraternity.

JOSHUA PLUMMER PILLSBURY, B.S.

Associate Professor of Horticulture

Missouri Botanical Garden, '91-'95; Certificate, Pennsylvania State College, '06-'10; B.S., Connected with Pennsylvania State College, '95-'11; N. C. A & M, '11—

MELVIN ERNEST SHERWIN, B.S.A., M.S.

Associate Professor of Soils

B.S.A., University of Missouri, '08; M.S., University of California, '09; University of Missouri, '06-'08; Assistant in Agronomy, University of California, '08-'09; Assistant in Agronomy, University of Maine, '09-'10; Associate Professor of Soils, N. C. A & M, '10—

Assistants and Instructors

ZENO PAYNE METCALF, B.A.

Associate Professor of Zoology and Entomology

B.A., Ohio State University, Assistant in Zoology and Entomology, Ohio State University, '06; Instructor in Biology, Bloomington (Illinois) High School, '07; Instructor in Entomology, Michigan Agricultural College and Assistant Entomologist, Michigan Experiment Station, '07-'08; Assistant Entomologist, North Carolina Department of Agriculture, '08-'12.

BARTHOLOMEW MOORE PARKER, B.S.

Assistant Professor of Textile Industry

B.S., A & M of N. C., '98; Student in Lowell Textile School, Mass., '98-'01; Assistant in Clemson College, S. C., '01-'03; Instructor in Textile School, N. C. A & M, '03-'05; Assistant Professor of Textile Industry, '05—

CARROLL LAMB MANN, B.S., C. E.

Assistant Professor of Civil Engineering

B.S., N. C. A & M, '99; C. E., '06; Isthmian Canal Commission, Nicaragua, '99-'01; Civil Engineer, Seaboard Air Line Railway, '01-'02; Instructor in Civil Engineering, N. C. A & M, '02-'08, Assistant Professor, '08—

GEORGE SUMMEY, JR., PH.D.

Assistant Professor of English

A.B., Southwestern Presbyterian University, '97; Ph.D., '01; Student, University of Leipzig, '01-'02; Instructor in English, N. C. A & M, '03-'09; Assistant Professor, '09—

LILLIAN LEE VAUGHAN, M.E.

Instructor in Mechanical Engineering

B.E., N. C. A & M, '06; M.E., N. C. A & M, '09; M.E., Columbia University, '11—

WELDON THOMPSON ELLIS, B.E., M.E.

Assistant Professor of Machine Design and Steam Laboratory

B.E., N. C. A & M, '06; M.E., '08; Assistant Professor of Machine Design and Steam Laboratory, N. C. A & M, '07—

LEON FRANK WILLIAMS, A.B., A.M., PH.D.

Assistant Professor of Chemistry

A.B., Trinity, '01; A.M., '02; Ph.D., Johns Hopkins, '07; Assistant Professor of Chemistry, N. C. A & M, '07—

HENRY K. MCINTYRE, E.E.

Assistant Professor of Physics and Electrical Engineering

E.E., Columbia University, '99; with The Sprague Electric Co., '99-'00; New York Telephone Co., '00-'07; Grey Electric Co., '07-'08; Special Work in Electrical Engineering, '07-'08; Assistant Professor of Physics and Electrical Engineering, N. C. A & M, '09—

CHARLES BENJAMIN PARK

Instructor in Machine Shops and Assistant in the Power Plant

Graduate, Raleigh Male Academy, '82; Machinist for Seaboard Air Line Railroad, '82-'89; Instructor in Machine Shops and Assistant in the Power House, N. C. A & M, '90—

T. H. TAYLOR

Instructor in Poultry Husbandry

Graduate, R. I. College Poultry School, '00; Instructor in charge of Experiment Work, '00-'02; Briarcliff Farms, N. Y., '02-'04; Monmouth Poultry Farms, Freneau, N. J., '04-'06; Poultry Department, Pinehurst Farms, N. C., '06-'11; Assistant in Poultry Husbandry, N. C. A & M, '11-'12; Instructor in Poultry Husbandry, N. C. A & M, '12—

ABRAHAM RUDY, A.M., PH.D.

Instructor in Modern Languages

A.B., Polytechnic University, Riga, Germany, in Modern Languages, '85; A.M., University of New York, '02; Ph.D., '04; Public School Teacher with Certificate in Iowa, Nebraska, New York, '85-'02, in Philippine Islands, '04-'07; Instructor in Modern Languages, N. C. A & M, '07—

FRED BARNETT WHEELER

Instructor in Wood Shop and Pattern Making

Student, N. C. A & M, '06-'11; Instructor in Forge, '07-'12; Instructor in Wood Shop and Pattern Making, '12—

OLLIE POLK PITTS, B.A., B.S.

Instructor in Mathematics

Student, Peabody College, '00-'03; A.B., University of Nashville, Peabody College for Teachers, '03; Principal University Preparatory School, Fayetteville, Tenn., '03-'07; Student in Graduate Schools, University of Chicago, '07-'09; Laboratory Assistant in Physics, University of Chicago, '08-'09; Principal University Preparatory School, Petersburg, Tenn., '09-'11; B.S., University of Chicago, '12; Instructor in Mathematics, N. C. A & M, '13—

JOHN EDWARD HALSTEAD, B.S.

Instructor in Dyeing

B.S., Leeds University, England, '95; Chemist large carpet factory, Yorkshire, Eng., '96-'98; in charge of Chemistry and Dyeing Department, Leicester Technical College, Eng., '98-'99; Assistant Dyer in large dyeworks of Yorkshire, '00-'01; Assistant Manager of Cotton Pierec Dyeworks, Yorkshire, '01-'07; in charge of Dyeing Department, N. C. A & M, '08—

WILLIAM FRANKLIN PATE, B.S.

Instructor in Chemistry

B.S., N. C. A & M, '01; Assistant Chemist, University of Illinois, '01-'06; Assistant Chemist, Ohio Agricultural Experiment Station, '06-'11; Instructor in Chemistry, N. C. A & M, '11—

HERBERT NATHANIEL STEED

Instructor in Weaving and Designing

Special Textile Student, N. C. A & M, '03-'05; Assistant Instructor in Carding and Spinning, '05-'06; Instructor in Weaving and Designing, N. C. A & M, '06—

ROBERT PEACHY LATANE, B.S.

Instructor in Physics

B.S., Virginia Polytechnic Institute, '05; Instructor in Physics and Mathematics, Miller School, Va., '05-'07; '08-'09; Instructor, West Maryland College, '07-'08; Instructor in Physics, N. C. A & M, '09—

HAROLD HOOKER COBURN, M.E.

Instructor in Drawing

M.E., Massachusetts Institute of Technology, '09; Instructor in Drawing, N. C. A & M, '11—

WILLIAM TISDALE HURTT

Instructor in Forge

Student, N. C. A & M College, '09-'13; Instructor in Forge, N. C. A & M, '12—

EDGAR BYRON NICHOLS

Instructor in Forge

Student, N. C. A & M College, '09-'13; Instructor in Forge, N. C. A & M, '12—

WILLIAM FLOYD MORRIS, B.E.

Instructor in Shopwork and Drawing

B.E., N. C. A & M, '09; Instructor, N. C. A & M, '09—

JOHN W. NOWELL, PH.D.

Instructor in Chemistry

A.B., Wake Forest, '03; M.A., '07; Assistant in Chemistry, Wake Forest, '07-'08; Instructor in Chemistry, Wake Forest, '09-'10; Ph.D., Johns Hopkins University, '12; Instructor in Chemistry, N. C. A & M, '12—

JOHN WILLIAM HARRELSON, B.E.

Instructor in Mathematics

B.E., N. C. A & M, '09; Instructor in Mathematics, N. C. A & M, '09—

VIRGIL CLAYTON PRITCHETT, M.S.

Instructor in Physics

Ph.B., Elon College, '07; Harvard Summer School, '07; Instructor in Physics, Elon College, '08-'09; M.S., University of North Carolina, '10; Instructor in Physics, N. C. A & M, '10—

WARREN CARY NORTON, PH.B.

Instructor in Botany and Bacteriology

Ph.B., Brown University, '10; Instructor in Botany and Bacteriology, N. C. A & M, '10—

EDSON DANA SANBORN, B.S.

Instructor in Dairying and Animal Husbandry

B.S., New Hampshire College, '10; Instructor, N. C. A & M, '10—

RUBLE ISAAC POOLE, B.E., C.E.

Instructor in Civil Engineering

B.E., N. C. A & M, '08; C.E., Cornell University, '10; Instructor in Civil Engineering, N. C. A & M, '10—

BENNETTE THOMAS SIMMS, D.V.M.

Assistant in Anatomy and Physiology

D.V.M., Alabama Polytechnic Institute, '11; Instructor N. C. A & M, '11—

HARRY TUCKER, B.A., B.S.

Instructor in Mathematics and Civil Engineering

B.A., B.S., Washington and Lee, '10; Assistant in Physical Culture, '09-'10; Instructor in Mathematics and Civil Engineering, N. C. A & M, '10—

FRANKLIN JACOB CRIDER, B.S.A., M.S.A.

Assistant in Horticulture

B.S., Clemson College, S. C., '08; Assistant in Horticulture, Clemson, '08-'09; M.S., University of Minnesota, '10; Instructor in Horticulture, N. C. A & M, '10—

HARRY HOUSTON PECKHAM, A.B.

Instructor in English

A.B., Hiram College, Ohio, '06; Graduate Student, University of Chicago, '08-'10; Instructor in English, N. C. A & M, '10—

CHARLES BURT ROSS, B.AGR., M.S.

Instructor in Poultry Husbandry

B.Agr., W. Va. University; M.S., Michigan Agricultural College; Manager of Dairy and Poultry Farm; Institute Worker and Grange Organizer; Instructor in Poultry Husbandry, N. C. A & M, '12—

FLEMING BATES SHERWOOD, B.S.

Instructor in Chemistry

B.S., N. C. A & M, '12; Instructor in Chemistry, N. C. A & M, '12—

LA FAYETTE FRANK KOONCE, B.S., D.V.S.

Instructor in Veterinary Science

DUANE B. ROSENKRANS, A.B.

Instructor in Botany

A.B., Upper Iowa University; Instructor in Botany, N. C. A & M College, '11—

EDGAR ALLAN HODSON, B.S.

Instructor in Agronomy

Eighth District Agricultural School, Athens, Ala., '09; B.S., Alabama Polytechnic Institute, '11; Instructor in Agronomy, N. C. A & M College, '12—

DONALD CORBLY SOUTH

Instructor in Physics

Graduate, Lewis Institute, Chicago, '09; Louisiana State Normal School, '10; Lewis Institute, Chicago, '10-'11; Assistant Principal, Homer High School, Homer, La., '11-'12; Instructor in Physics, N. C. A & M, '12—

J. W. WINSTON, B.S., M.S.

Assistant in Plant Pathology

B.S., Virginia Polytechnic Institute; M.S., Pennsylvania State College; Fellow in Botany and Assistant Botanist to the State College of Pennsylvania and Experiment Station, '11-'12; Assistant in Plant Pathology, N. C. A & M, '12—

LANDING OF THE PILGRIMS

Senior Class Poem

The comradeship, dear classmates,
Is about to disappear,
But in our hearts, old fellows,
The memories are always dear.

We've been in plights and joys alike;
We've fought a noble fight,
And may we show the world, old boys,
We'll have but good and right.

So, now that we're about to part,
God's blessings on thee ever,
Look to the good, uphold the right,
A & M '13 forever!

CLASS POET.

THE SENIOR GIRL.

Senior Class History

One hundred and twenty-eight. That was the force which our class marshalled into the hitherto unknown mysteries of college life in September, 1909. This number was made up of undignified, reserved country rustics and disdainful city high school graduates along with all intervening castes represented. But the barriers of caste and lack of acquaintance began to crumble away when, for the first time, we all assembled in Pullen Hall to elect officers for the Class of 1913.

At the first meeting R. J. Powell was chosen to serve his half organized class in the capacity of temporary President. A few weeks later permanent organization was effected, this time with J. I. McCallum, the happy go lucky "Hornet," in the Chair. The colors adopted were navy blue and white; the flower, the violet—emblem of faithfulness; and the motto, "We live to learn," is being exemplified every day. McCallum's ideal was an organization for unity. He did more, perhaps, than any other one man to effect harmony both in the class and between classes.

Our Sophomore year, one hundred and one strong, was led by D. A. Robertson as President. Robertson, an almost faultless athlete, instilled into his class athletic ideals. During this year individuals of the class began to take active part in the work of the Literary Societies, Y. M. C. A., various clubs, and to interest themselves in all the activities of college life.

J. B. Coward, presiding over our Junior year, bridged most happily that transient period from underclassmen to Seniors for the sixty-six who had, defying difficulties, persisted thus far on the course.

The President of the Senior Class is C. G. Spencer, whose ideal has been cooperation with the Faculty for the betterment of A & M. Fifty-seven men have survived the weeding out process to which the class has been subjected during the past four years. In this number are a few who have joined along the road.

In athletics the class holds a distinctive record, unparalleled in the history of the college. Her football team has never been scored upon! This is due largely to the self-sacrificing spirit of the individual players manifested while in training for the different class games. In baseball our class won the championship as Freshmen. Defeat, however, was our portion for both Sophomore and Junior years.

The Class of 1913 has furnished some of the best gridiron material that the State afforded. D. A. Robertson and D. B. Floyd were accorded places on the All South Atlantic Squad. The following men have all played Varsity ball—

P. D. Davis, D. B. Floyd, G. C. Glenn, W. T. Hurtt, D. C. Jeffrey, D. A. Robertson, C. G. Spencer, S. B. Sykes, and W. H. Von Eberstein.

In baseball the class has been represented by D. A. Robertson and R. E. Page.

The class had much to do with the development of basketball in A & M and has furnished two good players in D. C. Jeffrey and D. A. Robertson.

In track the Class of 1913 stands conspicuous in the characters of F. C. Smith, W. H. Sullivan, J. C. Small, D. A. Robertson, W. T. Hurtt, D. B. Floyd, and G. C. Glenn.

The interest manifested by the various college activities has been a dynamic force in propelling the work of these organizations. No other class in recent years has contained so many eligibles to the Presidency of the Y. M. C. A. The Literary Societies have both found good men and hard workers to replenish their forces. The Honor System could never have been instituted without the support of this class. The work of raising funds to erect the handsome Y. M. C. A. Building which now adorns our campus rested heavily upon us. Another significant fact is the large number of men who have throughout their course done outside work to defray their college expenses, either in part or in whole.

The scholarship of the class has been above the average of previous classes. Twenty-one men have made the Honor Roll one or more of the first three years, while five men will have an average grade of over ninety on all their subjects for the entire four years spent on classes.

The growth of the college during our sojourn has been substantial and little less than phenomenal. This old campus would look dreary indeed should we see it shorn of the 1911 Dormitory, Winston Hall, the Dining Hall, The Animal Husbandry Building, the Y. M. C. A. Building, and the new barns. Nor are we forgetful of the days when we drilled on Cameron Field—the now beautiful residential suburb of Raleigh.

We have now run the gauntlet. The goal looms to view. We have fought a good fight and have kept the faith. The responsibilities, which must inevitably accompany the distinction of superior training, are awaiting us—knocking at the door. We have been boys together, now we emerge as men to separate.

HISTORIAN.

LEWIS ALLEN AMMON, "Bull"

Marshall, N. C.

Agriculture

"You can take the man out of the country but not the country out of the man."

Age, 21 Height, 5'-10½" Weight, 180

Class Football Team (2); President Rural Science Club; Honor Roll; Censor Leazar Literary Society (3); Y. M. C. A. Cabinet (4); Biological Club; Rural Science Club; Y. M. C. A.; Leazar Literary Society; Biag Society; "Company Q"; C. P. D.

Endowed with the intellect of a logician, the ambition of a statesman, the determination of a "Bull Moose," and the ability of a mountaineer, this man from "The Land of the Sky" will some day startle the world of science with some addition to the present accumulation of scientific knowledge. "There is always room at the top of the ladder."

GILBERT LUTHER ARTHUR, JR., "Pie"

Morehead City, N. C.

Chemistry

"O! What is this thing which first we see?
One famed for music and Chemistry."

Age, 21 Height, 5'-9" Weight, 160

Private Band (1); Private Band, College Orchestra (2); First Sergeant Band (3); Assistant Director of Band; Company "Q" (4); Berzein-lun Chemical Society '11-'12; Y. M. C. A.

"Pie," the guy who put bone in trombone. He is a musical genius and is a part of all the shows that come to Raleigh. "Pie" is thoroughly original in thought and action. Although he differs with Bart Fearing as to what constitutes good looks, he does not allow this to affect his disposition. He gives everybody a square deal, stands well in his classes, and is destined to succeed in whatever he undertakes.

CHARLES SIDNEY ANDREWS, "Colonel"
Kinston, N. C.

Mechanical Engineering

"It takes all sorts to make the world."

Age, 25 Height, 5'-8" Weight, 148

Y. M. C. A.; Mechanical Engineering Society;
"Company Q."

Here is a hard worker. "Colonel" can always be found with a lot of notebooks and papers in his hand. He is a man that always smiles no matter what may happen. He hails from Kinston and has boosted his home town in an enthusiastic way. We congratulate "Colonel" on his abilities as a machinist, and for being "Fessor" Park's righthand man.

CHARLES ALBION BACIE, "Back"
Live Oak, Fla.

Electrical Engineering

"Music hath charms to soothe the savage beast."

Age, 22 Height, 5'-8½" Weight, 147

Band; Member of Everglades Club (1); Punctuality Roll; Leazar Literary Society; Band (2); Band, Y. M. C. A. (3); Member of the West Raleigh Branch of the A. I. E. E.; "Company Q"; Y. M. C. A.

Has acquired local fame as a cornetist which proves his persistency under the most adverse circumstances, as on seven different occasions he has had the riot act, better known as the "main building episode," read as a result of tooting his horn at the early hour of seven a. m. Sundays. This proves the old adage that if at first you don't succeed keep on sucking (a cornet) until you do. At heart a Baptist but the thought of immersion drives him to the Methodists. The ringtail rounder from the "Everglades." "The band 'gits' in free, let's all go to Norfolk."

ROGER MOORE BAILEY, "Manager," A Z
Elm City, N. C.

Agriculture

"In other words, manager of the baseball team."

Age, 21 Height, 5'-9" Weight, 130

Class Baseball Team (2); Class Baseball Team; Captain of Class Baseball Team; Assistant Manager of Varsity Baseball Team (3); Manager 1913 Varsity Baseball Team (4); "Company Q"; Country Gentlemen; Y. M. C. A.; Chi Club; Oak Ridge Club.

A serene, unassuming, pleasant countenance, a disposition giving offense to none—he counts his friends by his acquaintances. The executive ability displayed by this son of Elm City in managing A & M's baseball team, combined with his superior mathematical rating obtained during his first year's residence in Raleigh are ample assurance for his success.

EDWIN DENNIS BOWDITCH, "Ed"

Toecane, N. C.

Agriculture

"There is nothing in the universe I fear but that I shall not know my exact duty, or shall fail to do it."

Age, 24 Height, 5'-10" Weight, 160

Corporal Company D (2); Sergeant Company F (3); Second Lieutenant Company D; Track Team; President Rural Science Club (4); Lenzar Literary Society; Rural Science Club; Biological Club; Country Gentlemen; "Company Q"; Honor Graduate.

"Ed" strolled in among us from the hills of Mitchell County as much a mountain lad as you ever saw. Since then he has been, first of all, a good student, and as chance permitted he has tried his hand at baseball, track, dancing, music, and platform work. Always, whether in the middle of success or failure, his character and disposition remained the same. There will be more written about this man before we write his epitaph.

GRADY LEE BAIN, "Gert," Greensboro, N. C.

Civil Engineering

"Who makes quick use of the moment, is a genius of prudence."

Age, 22 Height, 5'-11" Weight, 145

Class Poet; Private Company C (1); Corporal Company B; Vice-President Class (2); First Sergeant Company E; Manager Class Football Team (3); Secretary Civil Engineering Society '12; Captain Company D; Chairman Society Committee Y. M. C. A.; Associate Editor AGROMECK (4); Gang; Guilford County Club; Big Seven; Pillen Literary Society.

This young man has a habit of producing marriages, having lost three roommates in three years, all of whom are now married. We are not sure when "Gert" will do the same stunt, but it is bound to come from the present outlook. He is the efficient Captain of D Company and is respected by all. He has tried many times to impress upon the boys that the scarcity of his hair is not due to old age. "Gert" is a jolly good fellow and is seldom found in his own room, but generally hangs out, either in "Tick's" room or with "Tubby."

HERMON BURKE BRIGGS, "H.B." II K A
Raleigh, N. C.

Mechanical Engineering

"If music be the language of love, play on."

Age, 22 Height, 5'-10 $\frac{3}{4}$ " Weight, 138

Class Baseball Team (1); Honors in Scholarship (2); First Sergeant Company C (3); Captain Company C; Critic Mechanical Engineering Society '12; President Mechanical Engineering Society '13; Associate Editor AGROMECK; Bingville Club (4).

Here is a man that is as true as steel. When you want him, just pipe out "H. B." and he is at your service. Our friend is from Raleigh, but he doesn't seem to mind it very much. If you see him smiling and happy, he has just received a letter from Laurel Springs, which, by the way, is about every day. When you see him looking blue and disheartened, his daily was delayed. "H. B." hangs out in No. 21 Watauga, "Bessie's" room. Sunday you can see him in the First Baptist Church Choir; when he is not ventilating this loft, he sings bass.

AMOS BAXTER CLEMENT, "Mike"

Oxford, N. C.

Electrical Engineering

"I can guard my own."

Age, 21 Height, 6'-0" Weight, 155

Private Company A (1) (2); Sergeant Company B (3); Member of West Raleigh Branch A. I. E. E.; "Company Q"; Y. M. C. A. (4).

When not writing lab. experiments or studying machine design under the Master Mind, "Amos" brags on how fast his whiskers grow. He is a great track man and runs, not to break college records, but to show his shapely limbs, which he absolutely refuses to admit are bowed. This young man is ambitious to be an aeronaut but to date has gone aloft only on a transformer pole, from the top of which he was rescued with great difficulty by a Freshman with a ladder. When it comes to imbibing knowledge and getting through with class-work he is one of the fastest men in the class. "I will work hard today so that I can loaf tomorrow."

THOMAS ALEXANDER COLE, "Billy"

Cole's Mills, N. C.

Agriculture

"From the crown of his head to the sole of his feet he is all mirth; he hath a heart as sound as a bell, and his tongue is the clapper, for what his heart thinks his tongue speaks."

Age, 24 Height, 5'-8" Weight, 160

Class Baseball Team; Class Football Team; Scrub Varsity Baseball Team (1); Class Football Team; Class Baseball Team; Scrub Varsity Football Team (2); Class Football Team; Class Baseball Team; Scrub Varsity Baseball Team (3); President Country Gentlemen; "Company Q" (4); Biological Club; Y. M. C. A.

"Billy" is a worthy son of Moore County. It has never been satisfactorily explained why he came to A & M, since his build just fits the cab window of a locomotive. Cole has manifested a constant interest in the progress of agricultural science during his sojourn on the hill. He has a cheery disposition and has been the life of his division.

WILLIAM RANDOLPH CLEMENTS. "Willie"
Raleigh, N. C.

Electrical Engineering

"Small in stature but large in brains."

Punctuality Roll (1); Corporal Company C; Punctuality Roll; Class Baseball Team (2); Sergeant Company D; Class Football Team; Class Baseball Team; Manager Class Baseball Team (3); First Lieutenant Company B; Member of West Raleigh Branch of A. J. E. E.; Pullen Literary Society; Y. M. C. A. (4)

"Willie" is a bull when it comes to traveling. During his vacation he started for Cuba, but was persuaded by a dearly beloved classmate to spend the Christmas holidays in the "Everglades," rambling amongst the orange groves. Very timid around the "wimmen" folks,—gave up this trip to Cuba because of the great number of ladies on board. "You are about right."

LINSTON LLOYD DAIL. "Chinquapin"
Chinquapin, N. C.

Chemistry

"Beware the fury of a patient man."

Age, 25 Height, 5' 4" Weight, 130

Private Company C (1); Corporal Company B; Secretary Leazar Society (2); Sergeant Company E; Declaimer, Junior Debate; Vice-President Leazar Society (3); Associate Editor AGROMECK; Senior Debate; Second Lieutenant Company B; Critic Leazar Literary Society; Editor *Red and White*; Y. M. C. A. Cabinet; Quarters-Inspector (4).

"Chinquapin"—In this serious young man we have an ideal student. When not in his room he can be found in the Y. M. C. A. Some people think that the Ministry has lost a good man, but the Ministry's loss is the Chemical's gain, for Dail will undoubtedly surpass the world some day by his untiring efforts in research work.

PAUL DEXTER DAVIS, "P.D." Fremont, N. C.

Civil Engineering

"Who deserves well, needs not another's praise."

Age, 22 Height, 5'-9 $\frac{1}{4}$ " Weight, 165

Class Football (1); Sub-Varsity Football Team; Corporal Company E (2); Class Football Team; Sub-Varsity; Class Basketball Team (3); Varsity Football Team; Secretary Senior Class; Secretary Civil Engineering Society '13; Division Inspector; Quartermaster "Company Q" (4); Y. M. C. A.; Leazar Literary Society; Civil Engineering Society; "Calico Co."; Honors in Scholarship for four years.

"P. D." is both a scholar and an athlete. In his Sophomore year he went out for football and has been giving his opponents a hard fight ever since. He is also a good scholar and there is no doubt that he will succeed in whatever he undertakes to do. He is one of the few athletes in the history of the college who has made honors in scholarship for four years.

PERCY BELL FEREBEE, "Peby"

Elizabeth City, N. C.

Electrical Engineering

"O, he will whistle the savageness out of a bear."

Age, 22 Height, 6'-1" Weight, 163

Corporal Company A '09-'10; Assistant Manager Basketball Team '09; Class Football '09-'10; Scrib Football, '10; Manager Basketball Team, '10; First Sergeant Company D '10-'11; Marshal Senior Debate '10; Assistant Business Manager *Red and White* '10-'11; Captain Basketball Team '10; Business Manager *Wau Gau Roe* '11-'12; Captain Company E '11-'12; Secretary and Treasurer Athletic Association '13; President Elizabeth City Club; Y. M. C. A.; Pullen Literary Society; Lil rarian Pullen Literary Society '13; Student Member A. I. E. E.

This "Whistling Rufus" from Elizabeth City makes many mysterious visits to town on the slightest provocation. He is a hustler and in for anything to make money. Calculus is his "hobby." He is now applying his mathematical ingenuity to the solution of the problem of building roasters in oyster beds to furnish the consumer with a delicious quality of oyster cocktail.

JOHN BARTLETT FEARING, "Bart," $\Sigma \Phi E$
Elizabeth City, N. C.

Chemistry

"This world is hell, others may be worse."

Age, 21 Height, 5'-6" Weight, 145

Private Company D (1, 2, 3); Class Basketball (2); "Company Q"; Y. M. C. A.; Thalarian German Club; Elizabeth City Club; Berzelius Marsh Chemical Society; Y. M. C. A.

"Bart" has never been known to spend more than fifteen minutes preparing any one lesson. A glance is sufficient, but he stands high in all of his classes. "Bart" is present at all of the dances and has done much to develop social life at A & M. He thinks that breakfast and Chapel should be dispensed with or put off until afternoon. His chief amusement while in the laboratory is dropping big words for "Rastus" to stumble over.

DANIEL BERNE FLOYD, "Private"
Fairmont, N. C.

Mechanical Engineering

"My heart is true as steel."

Age, 23 Height, 6'-1" Weight, 200

Varsity Football Team '08, '09, '10, '11; Varsity Track Team '10, '11, '12, '13; Captain Varsity Track Team '13; President Athletic Association '12; President Mechanical Engineering Society '12; Vice-President Senior Class '13; Assistant Football Coach '12; Class Football Coach '09, '10, '11, '12; State Record on Shot, Hammer and Discus; South Atlantic Record on Hammer and Discus; All South Atlantic Football Team '10-'11; All State Football Team '09, '10, '11; Gang; Y. M. C. A.; Bingsville Club; "Company Q"; Robeson County Club.

Here is an allround fellow and allround athlete. "Private" has made a record in athletics since coming to A & M that is equaled by few and surpassed by none. He entered one year before his class to extend to us a glad hand and show us the ropes upon our arrival. "Private" is some ladies' man too; and by his manly physique and good looks he has won the admiration of many of the fairer sex. You can always find him most anywhere except in his room.

ROY DURANT GOODMAN, "R.D."

Concord, N. C.

Agriculture

"The real thing on the farm but an awful thing on Broadway."

Age, 24 Height, 6'0" Weight, 165

Punctuality Roll (1); Corporal Company B; Treasurer Biological Club; Class Football Team (2); Vice-President Biological Club; Class Football Team; Class Baseball Team; Treasurer Leazar Literary Society; Quartermaster Sergeant and Color Sergeant, Essay Prize in Rural Science Club (3); President Biological Club; Censor Leazar Literary Society; Critic Rural Science Club; Captain and Quartermaster (1); Y. M. C. A.; Country Gentlemen; Bug Society; Leazar Literary Society; Biological Club; Rural Science Club.

Since Goodman has been with us he has shown that he is a hard worker and spends most of his time on his studies, but occasionally we find him out among the "edicoes" where he "laughs and talks" to his heart's content. On the athletic field he has also made good and has helped our class teams win many a battle on the gridiron. Goodman will make some collection agency a good man, for when it comes to getting the coin he is right there. His interest in college activities is well recognized.

WINSTON P. GWATHMEY, "Slick," K A

Richmond, Va.

Civil Engineering

"Good humor is the health of the soul."

Age, 19 Height, 5'8" Weight, 135

Scrub Baseball Team; Class Baseball Team; Private Company C (2); Scrub Baseball Team; Class Baseball Team; Private Company B (3); "Company Q"; President Civil Engineering Society (1); Y. M. C. A.; Thalarian German Club

To know "Slick" is to like him. He hails from Richmond and butted in with us in our Sophomore year, although much against his will, but we are proud of him. To find him in a bad humor is nearly impossible, and he is always ready to help a friend. Since his arrival he has always kept up the spirits of the C. E. Division, and without him there would have been something lacking. Whenever you see "Slick" uptown, you will also see his Freshman.

CICERO FREDERICK GORE, "Cis"
Wilmington, N. C.

Civil Engineering

"For they can conquer who believe they can."

Age, 25 Height, 5'-9 1/2" Weight, 165

Class Baseball Team; Class Football Team (1); Class Baseball Team; Class Football Team (2); Vice-President Pullen Literary Society; Captain Class Football Team; Class Baseball Team; Inter-Society Declaimer; Assistant Business Manager *Red and White*; Sergeant Company F (3); President Civil Engineering Society '12; Vice-President Athletic Association; Critic Pullen Literary Society '12, President '13; Chief of Hospital Corps "Company Q"; Senior Debater; Y. M. C. A.; Pullen Literary Society; Civil Engineering Society; "Calico Co."

"Cis" is a hard worker and has made good at A & M. He has held an office in everything that he has been into, which goes to show both his worth and popularity. He and "Fido" have been constant companions for four years, and when you see "Fido" you will also see Cicero. He is a good athlete, having been captain of the scrub football team for two years, and if he had gone out in his Senior year, we believe he would have made the Varsity.

FELIX SEANTON HALES, "Tick," Σ Φ Ε
Wilson, N. C.

Civil Engineering

"Love is a disease that is incurable."

Age, 20 Height, 5'-6" Weight, 130

Class Historian (1); Honors in Punctuality; Corporal Company C (2); First Sergeant Company B; Assistant Editor in Chief *Wan Gau Rac* (3); Captain Company A; Editor in Chief *Wan Gau Rac*; Treasurer Civil Engineering Society; Associate Editor 1913 *AGROMECK* (4); Gang; Thalarian German Club; Y. M. C. A.; "Calico Co."; Honors in Scholarship for four years.

The reader must not draw upon his imagination for the makeup of "Tick." He is by far the leading allround man of the class, making "I's" on every subject being a chronic habit. This young man, however, is in a quandary as to whether he shall continue his studies at Cornell or locate in Statesville. Either way his success is assured. Though small in size, he is ranking Captain and can handle "A" Company like a veteran army officer. He loves three things—his classwork, to worry "Tub," and to love. For further information regarding "Tick" see "Tub" Hewitt.

CHARLES GANZER HALL, "Vallie"
Wilmington, N. C.

Textile

"Like a circle ending never, does my mirth go on forever."

Age, 21 Height, 5'-7" Weight, 159

Y. M. C. A.; Chaplain "Company Q"; Assistant Business Manager Agromeck; Y. M. C. A. Social Committee; Big Seven; Pullen Literary Society; Tompkins Textile Society; Glee Club; Critic Pullen Literary Society '13; President Tompkins Textile Society '13, Vice-President '11, Secretary and Treasurer '10; Librarian Glee Club '10-'11; Assistant Chief Rooter '10-'11; Chief Marshal Oratorical and Declamatory Contest '10; Captain Scrub Football Team '08; Track Team '09-'13; Basketball Squad '09; Scrub Football Team '08-'10, All Class Football Team '07; Alternate Senior Debate '13; Gang.

"Vallie" came to us at the beginning of our Senior year. He was not a new man, as he entered college with the 1911 Class. Upon entering college last fall he at once fell into his work and we predict great things for him. "Charlie" has a number of nicknames attached to him, the best known being "Vallie," but it does not signify that he is bit shallow, as he has proved to be a good student, and with the experience he received as Assistant Business Manager of The Agromeck he will make a good business man some day. Believing in the old adage, "Try, try again," he has finally succeeded in getting the long looked for "sheepskin."

THOMAS ROY HART, "Windy" Monroe, N. C.

Textile

"I am no orator as Brutus is, I only speak right on."

Age, 22 Height, 6'-0" Weight, 160

Corporal; Honors in Scholarship (2); Vice-President Tompkins Textile Society; Sergeant Company E; Class Football Team; Alternate Junior Debate; Oratorical Contest; Honors in Scholarship (3); Vice-President Union County Club; Alternate Declamatory Contest; Alternate Senior Debate; President Leazar Literary Society; Editor *Red and White*; Lieutenant Company D (4); Y. M. C. A.; Gang; Leazar Literary Society; Tompkins Textile Society.

"Windy" is a bit breezy with the language, but is an excellent student and during his years at A & M he has always carried his share of good grades. Far above anything else "Windy" loves athletics and he can at any time tell you the complete record of any athlete. In addition to his athletic knowledge, "Windy" has stored in his head a lot of ideas about Scientific Management, which some day will place him on a high pedestal. At all times he finds opportunities to ease to town to chat with the fair sex, and what he tells them we know not. He never claims to be in love, but somehow we fear he is in that fix, but we are sure nothing serious will develop from it.

LEROY CORBETT HAND, "Elsie," $\Sigma \Phi E$
Chadbourn, N. C.

Textile

"Music hath charms to soothe a savage beast."

Age, 20 Height, 6'-0" Weight, 180

Secretary Tompkins Textile Society (2); Vice-President Tompkins Textile Society; Vice-President Class; Assistant Manager Track Team; Class Football Team; Sergeant Company F (3); Manager Track Team; Member Athletic Council; "Company Q" (4); Y. M. C. A.; Gang; Honors in Scholarship '10-'11.

"Elsie," as he was dubbed by the fellows, is not in the least feminine as his *nom de plume* signifies. He holds the record of having the largest head of any man in college, as he wears a $7\frac{1}{2}$ hat. His cranium is far from empty, as upon analysis you will find it to be full of material that has proved he will some day be a leading man of Chadbourne. When it comes to taking things as they come "Elsie" is a prince, and as manager of the track team he developed great things. Of bad habits he has but one, that of whistling at all times, except when asleep—and then sometimes we hear a note or two from his room.

THOMAS JASPER HEWITT, "Tubby"
New Bern, N. C.
Civil Engineering

"Rest is the sweet sauce of labor."

Age, 22 Height, 5'-9" Weight, 185

Private Company D; Leazar Literary Society (1); Corporal Company C; Secretary Leazar Literary Society; Treasurer of Class (2); First Sergeant Company F; Secretary of Class; Assistant Editor in Chief *Red and White* (3); Major; Editor in Chief 1913 AGROMECK; Honorary Member Carteret County Club; Treasurer Civil Engineering Society; Big Seven; Y. M. C. A. (4); Honors in Scholarship for four years.

"Tubby" is our Major and if you want to see him at his best, you should be on the parade grounds to hear him call "Battalion, Attention!" He is an allround good fellow, though, and many a night he has been known to help some poor soul to bed. Of course, this happened before his "Majorship." "Tubby" is also right there when it comes to English and Calculus, and he has always stood among the first of his classes.

RILEY WEAVER HIGGINS, "Kibe"
Leicester, N. C.

Agriculture

"Love hath made this thing a man."

Age, 21 Height, 5'-6" Weight, 140

Punctuality Roll (2); Marshal Senior Debate (3); "Company Q"; Rural Science Club; Biological Club; Leazar Literary Society; Country Gentlemen; Vorwärts Verein.

"Kibe" is quiet and easy going, yet he is known and liked by all throughout the college. During his first three years at college we found him close by his books, but for the last year he has often been found in society. He is one of those fellows who can do things and who never speaks until he is sure. We all expect him to revolutionize agriculture in Buncombe County in the near future.

WALTER CLEARY HOPKINS, "Sis"
Newport News, Va.

Civil Engineering

"The glass of fashion and the mould of form,
The observed of all observers."

Age, 20 Height, 6'-0" Weight, 150

Class Football Team; Scrub Football Team (2); Chaplain Pullen Literary Society; Assistant Chief Rooter; Class Poet; Marshal Senior Debate; Grounds Committee; Manager Class Basketball Team; Assistant Manager Varsity Basketball Team (3); Class Poet; Member Athletic Council; Censor Pullen Literary Society '12; Librarian Civil Engineering Society; Associate Editor *Red and White*; Manager of Varsity Basketball Team; Captain of Band (4); Gang; Y. M. C. A.

"Hop" "Sis" is one of the Seniors whose ambition is to get married, and if he succeeds in Engineering as he has at school it will not be long before we hear of Mrs. Hopkins. "Hop" has always taken an interest in athletics and was the efficient manager of the basketball team, and has done more than any of his predecessors toward establishing this branch of athletics in our college.

PETER ARMSTRONG HOLT, "Peter"
Graham, N. C.

Agricultur.

"Modesty is the grace of the soul."

Age, 22 Height, 5'-9" Weight, 140

Private Company C (1); Corporal Company E (2); Sergeant Company B (3); "Company Q"; Biological Club; Alamance County Club; Country Gentlemen.

"Peter"—This quiet, unassuming youth from Graham doesn't stand out prominently as a star performer in any particular branch of his work, but he is a steady worker whom we may all expect to hear from after he leaves college. His kind and generous disposition has won him a host of friends among the students. He has won quite a reputation as a business man through his connection with the "Holt-Holt Tailoring Company."

ERNEST JUDSON JEFFRESS, "Rubber," "Jeff"
Canton, N. C.

Electrical Engineering

"Eat, drink and be merry, for tomorrow we may die."

Marshal Senior Debate; Private Company B (1); Corporal Company A (2); Sergeant Company C; Class Football Team; Class Basketball Team; Electrical Engineering Society; Class Historian; Historian Junior Class (3); Comic Editor 1913 AGROMECK; Exchange Editor *Red and White*; Treasurer Senior Class; Captain Company E; Student Member A. I. E. E. 4; Leazar Literary Society; Thalarian German Club; Electrical Society.

"Rubber" earned this appellation as a result of his ability as a trencherman. He is emphatically antagonistic to all hack drivers. His chief vocation is goating with "Shakespeare" Johnson. "Jeff" can always be found either at the West Raleigh post-office or the dining hall. A lady was once heard to remark that he was the sweetest, purest boy she knew. "Rubber's" only hope is to marry a girl with plenty of money and too proud to allow him to work. ("Git your Fair tickets heah, fifty cents or half a dollar.")

DOUGLAS CREEDMORE JEFFREY, "Dug"
West Raleigh, N. C.

Civil Engineering

"He was a man; take him all in all
I shall not look upon his like again"

Age, 21 Height, 5'-9" Weight, 170

Class Football Team (1); Class Football Team (2); Substitute on Football and Basketball Teams; Class Football Team (3); Varsity Football Team; Varsity Basketball Team (4).

"Dug" is our persevering football artist. He has shown the coach that he has the goods and owned a berth on the Varsity. His work on the basketball team has helped A & M win many a game. When it comes to ladies and dancing the light fantastic, "Dug" is there on the job. He is a good allround man in classwork, athletics, and college life in general. By his charming personality he has won for himself a host of friends among the boys and Faculty. He is bound to make good in whatever he undertakes and leaves with the best wishes of all his classmates.

HARVEY LANGILL JOSLYN, "Joslyn," A Z
Farm School, N. C.

Agriculture

"Sincerity and truth form the basis of every virtue."

Age, 23 Height, 6'-1" Weight, 160

President Glee Club (3); Business Manager Glee Club; President Y. M. C. A. (4); Y. M. C. A.; Big Society; Glee Club; Biological Club; Rural Science Club; Country Gentlemen.

"Joslyn" came to us from Maryville College during our Sophomore year. He hails from New Jersey originally, but seems satisfied at last with A & M as his Alma Mater. Since he came to us Joslyn has won the admiration of all who have come in contact with him. He is a good student, a straightforward Christian gentleman, and has made an excellent Y. M. C. A. President.

JAMES WRIGHT JOHNSON, "J. W."
"Shakespeare" Garland, N. C.

Electrical Engineering

"A hot temper leaps o'er a cold decree."

Age, 21 Height, 6'-2 $\frac{1}{4}$ " Weight, 180

Private Company A; Class Football Team (1, 2, 3); Secretary Electrical Engineering Society '12; Y. M. C. A.; Leazar Literary Society; "Company Q"; Student Member A. I. E. E.

This son of Sampson County has us all faded it when it comes to arguing. He is a strong supporter of all forms of athletics, a great roofer, and a very enthusiastic sport. An ardent admirer of "Mike" R., and ardently admired by the small boys of Raleigh. He expects to follow electrical work in the Philippines and is sure of success as he is a fighter when arguments fail to convince. To a man who is his friend "Shake" will lend his last dollar or fight for him to the last ditch.

GEORGE EDISON KIDD, "General Electric"
Rhodhiss, N. C.

Electrical Engineering

"I never felt the kiss of love, nor maiden's hand in mine."

Age, 19 Height, 6'-1 $\frac{1}{2}$ " Weight, 160

Private Company A (1); Class Football Team (2); Sergeant Company A; Class Football Team (3); "Company Q" (4); Y. M. C. A.; Pullen Literary Society; Electrical Society; Student Member A. I. E. E.

"Mr. Batch," of Sunday Comic fame has nothing on this lad when it comes to dodging "wimmen folks." He does not believe in the strenuous life and is always looking for a chance to kill two flies with one smack, and when he arrives at the "Shops" he will undoubtedly bestow upon the G. E. Company some labor saving device which will make him famous. As a football player George is a cutter, and has helped our class to many victories by his exertions in the line. He has a host of friends in every class in college and richly deserves them all.

LOUIS BRASWELL KNIGHT, "Lewie"
Tarboro, N. C.

Agriculture

"I have learned in whatsoever state I am, therewith to be content."

Age, 21 Height, 5'8½" Weight, 152

Private Company B (1); Corporal Company D (2); Band (3); Thalarian German Club; Biological Club; Country Gentlemen

"Lewie" is a happy go lucky who never lets his studies interfere with his regular college course. He is a shining light in society and never misses a dance. Louis has always made good in his work although he believes that the peaceful slumbers of dawn should not be disturbed. We feel sure that he will be recognized some day by the agricultural world.

ROBERT SYLVANUS MAUNEY, "Bob"
Murphy, N. C.

Electrical Engineering

"You Cassius has a lean and hungry look."

Age, 21 Height, 6'2" Weight, 175

Class Baseball Team; Honor Roll (2); Sergeant Company E; Class Baseball Team; Class Football Team (3); Lieutenant Company E; Division Inspector; Honor Roll; Student Member A. I. E. E. (4).

Here is the lad from the "moonshine section," and from his long residence in the mountains he has absorbed much of their silence. As a baseball pitcher he bisects the plate with kinks, shoots and twisters hitherto unknown to science, that are the despair of the unfortunate batter who faces him. The result of many years experience in the use of "ye olde squirrel rifle" won for him fame as a marksman and he now enjoys the distinction of being custodian of the shooting gallery.

MAURICE LIFEBOCK, "Liferock"

West Raleigh, N. C.

Civil Engineering

"My mind to me an empire is."

Age, 24 Height, 5'-6" Weight, 130

Vice-President Civil Engineering Society '13;
Punctuality Roll '10-'13; "Company Q"; Leazar
Literary Society; Honor Graduate

"Liferock" entered our class in the Sophomore year and has proved a valuable man to us. In theory, Hales is hardly his equal. To him Mathematics is a cinch; no formula can baffle his master intellect, and when it comes to Chemistry he makes them all take note. Liferock is strictly business and always finds something to do and does it well. All the boys respect and like him. We expect some day to see him high up in the engineering world, solving the difficult problems of the day.

FRANK WHITESIDE McCOMB, "Snail"

Hickory, N. C.

Mechanical Engineering

"If he be sad, he wants money."

Age, 20 Height, 5'-8½" Weight, 151

Class Football Team; Sergeant Company B '31; Second Lieutenant Company F; Secretary and Treasurer Mechanical Engineering Society '12, Vice-President '13; Division Inspector '11, Punctuality Roll '10, '11, '12; Bingville Club, Y. M. C. A.; Mechanical Engineering Society

"Snail" has been with us through thick and thin for four years, and has managed to keep up with the rest, although his name suits him well. When he once gets a thing he has it for good, and there is no giving up in him. "Snail" keeps his classmates well supplied with data, because he is constantly taking notes. "Snail" is bound to make good; and we doff our hats to this young gentleman from Hickory, who is admired by all of the fairer sex.

ROBERT TOLAR MELVIN, "Big Chief," "High"
A Z White Oak, N. C.

Agriculture

"He who reigns within himself and rules passions, desires and fears is more than a king."

Age, 26 Height, 6'3" Weight, 180

Vice-President Rural Science Club '11-'12; Corporal Company A '10-'11; Sergeant Company F '11-'12; First Lieutenant Company E '12-'13; Editor in Chief *Red and White* '12-'13; Associate Editor 1913 *AGROMECK*; Glee Club; Lenox Literary Society; Biological Club; Rural Science Club; Y. M. C. A.; Honors in Scholarship.

"Big Chief" believes in giving every man an honest hearing and a square deal. His literary ability has been displayed in editing our *Red and White*. He has proven himself an earnest student, always ready to participate in any college activity or social function. The waste places of Bladen may well anticipate the return of "High" Melvin.

THOMAS KENNETH MIAL, "Icky"
Raleigh, N. C.

Mechanical Engineering

"If I am your friend, there is nothing too much for me to do."

Age, 24 Height, 6'2½" Weight, 180

Honors in Scholarship '10-'11; Punctuality Roll '10-'11; Mascot of "Company Q"; Class Basketball Teams '11, '12, '13.

Here is another Raleigh citizen. "Icky" is one of the most practical engineers of his class. He loves to "Roam" in Georgia, but notwithstanding this fact, he is very regular on classes, and is one of our best students. He is very generous, keeping Dr. Rudy supplied with chalk and helping him keep order (?) on class. "Icky" is a famous driver. He is sometimes most too reckless, being found several times exceeding the speed limit across St. Mary's campus. However, "Icky" is bound to succeed in life, because he is a man that can't be downed, no matter what the circumstances.

LEWIS LARKINS MERRITT, "Lewie"
Wilmington, N. C.

Civil Engineering

"He was ever precise in promise keeping."

Age, 25 Height, 5'-9" Weight, 165

Corporal Company D (2); Sergeant Company C; Honor Committee; Assistant Manager Track Team (3); Vice-President Civil Engineering Society; "Company Q"; Y. M. C. A.; Thalarian German Club (4).

"Lewie" reentered college in our Sophomore year, and we have thereby gained a good man. He is one of those solid men who furnish the backing of a class. He is earnest in everything he undertakes and rarely fails to accomplish what he resolves. He has lately taken up the study of physical culture and we await with interest the results. "Lewie" is a "lady's" man for sure, and stands well with all of them. He is a natural civil engineer and great things are expected of him.

WILLIAM TIMOTHY NIXON, "Tim," A Z
Sunbury, N. C.

Agriculture

"The fruit derived from labor is the sweetest of pleasure."

Age, 22 Height, 5'-6" Weight, 140

Corporal Company B (2); Sergeant Company E (3); Second Lieutenant Company E (4); Y. M. C. A.; Country Gentlemen

Here is another fellow who belongs to the dwarf family in stature. "Tim" wears a smile of seraphic innocence and possesses the voice of a cooing dove, but in his dark brown eyes the devil twinkles and things are not what they seem. His studious habits have been marked. He is a friend of all. A man with a big heart and a sense of clear judgment. He will make some lady a typical husband for he is not stingy with his affections.

WALTER HERBERT PARKER, "Bessie"
Rocky Mount, N. C.

Mechanical Engineering

"To him there is but one beloved face on earth."

Age, 20 Height, 5'-11" Weight, 130

Medal for Best Drilled Private Company B (1); Corporal Company B (2); First Sergeant Company D, Class Baseball Team; Class Football Team (3); Captain Company B; Vice-President Mechanical Engineering Society '12, Censor '13; Y. M. C. A.; Bingville Club; Mechanical Engineering Society

Here is our military man. "Bessie" has made an excellent record here as a soldier, and has made many a Freshman's knees bump together by his stentorian voice. We all know that this young gentleman is very much interested in the furniture business, as he goes very often on this mission (?) to High Point. However, "Bessie" is a good engineer and has done most creditable work at college along this line. He and his friend "H. B." are always to be found in No. 21 writing what are supposed to be essays for Doctor "Tommy."

THOMAS HECTOR PURCELL, "Senator"
Maxton, N. C.

Textile

"That inexhaustible good nature, which is itself the most precious gift of Heaven."

Age, 23 Height, 5'-9" Weight, 170

Tompkins Textile Society Secretary; Secretary and Treasurer Robeson County Club (2); President Robeson County Club, "Company Q"; Y. M. C. A. (4)

The "Senator" is one of those easy, sincere fellows who takes time to analyze things before entering upon them, but always sticks to his classmates. The "Senator" falls for motorcycles and all kinds of machinery and his collection of odds and ends will some day become of great value to him. The smile upon his face is always evident and he delights in helping "Windy" Hart work on a fly frame. When it comes to motorcycles, why "Senator" forgets that his years have been spent in studying the mill game, but we are positive that some day soon cotton mills will be in his charge and they will all be run by gasoline.

THADDEUS ROWLAND PARRISH, "Legger"
Middleburg, N. C.

Electrical Engineering

"All pure lily and rose in his youth, like a lady."

Age, 24 Height, 5'-10½" Weight, 162

Punctuality Roll (1); Vice-President Y. M. C. A.; Sergeant Company A; Track Team (3); Captain and Adjutant; Corresponding Secretary Y. M. C. A.; Division Inspector (4); Leazar Literary Society; Student Member A. I. E. E.

"Thad" or "Legger," as he is commonly known, can always be found in the lecture rooms on the front seat looking wise. His knowledge of Electrical Engineering is only surpassed by his wonderful tenor voice, which is extravagantly admired by his classmates (?). He is not only a good student but takes an active part in the Y. M. C. A. and church work, and as a connoisseur of Pepsi-Cola he is justly famous.

HENRY AUBREY QUICKEL, "Babe"
Lincolnton, N. C.

Textile

"The greatest truths are simplest: so are the greatest men."

Age, 24 Height, 5'-9" Weight, 190

Manager Class Football Team (1); Corporal Company D (2); Sergeant Major (3); Lieutenant Company D; Editor AGROMECK (4); Tompkins Textile Society; Y. M. C. A.; Pullen Literary Society; Mecklenburg County Club; Big Seven.

"Babe" is not quite so small as you may think, nor so tall, but pretty well filled out. For a man with a high forehead there are great things in store. "Babe's" from his photo, goes all the way, so lookout, and in his own words he says, "Not baldheaded but just a long face." In addition to being a good mill man "Babe" is some artist on the telegraph key and we fear he loves the sound. For a jolly good fellow "Babe" is there with the goods and he appreciates a good joke; when he laughs it brings up a childish poem, which has delighted many a babe. "Quick" delights in reading poetry and is in the realm of happiness when "Val-lie" is reading "Love Letters of a Musician." They stroll some.

JOHN OLAN RANKIN. "Jonnie," H K A, A Z
Gastonia, N. C.

Agriculture

"I'll be merry, I'll be free, I'll be sad for nobody."

Age, 21 Height, 5'-7" Weight, 130

Private Company D (1); Secretary Sophomore Class; Secretary Agricultural Class; Corporal Company D (2); Chief Trumpeter (3); Second Lieutenant Company C; Business Manager 1913 AGROMECK (1); Y. M. C. A.; Country Gentlemen; Saints; Big Seven; Chi Club

A "good egg." One of the brightest men in his class and one of the smallest of the lucky 13's. He doesn't have to "bone" for exams; he thinks quickly and spreads the fluid, leaving his classmates with their heads buried in their hands trying to think. He is one fellow who attends to his own business and does it better than any one else can do it for him. To know him well, he is a good student, a good friend, and a jolly good fellow. That's "Jonnie."

WILLIAM DUDLEY SIMPSON. "Bill"

Raleigh, N. C.

Civil Engineering

"A gentleman and a scholar."

Age, 23 Height, 6'-1" Weight, 160

Honors in scholarship for three years.

"Bill" entered A & M in our Sophomore year and at once made himself one of the '13 Class. "Bill's" flow of language borders on genius. When it comes to diplomatic service, he is unsurpassed. We earnestly believe he could fence with William J. Bryan and hold his own. He can truthfully say, "When the English language gets in my way it does not stand a show." But this is not all—"Bill" can make first grade on all of his work and then find time to entertain the ladies and play his cornet. Good luck to "Bill," but what's the use—he will get there anyway.

GARLAND THOMAS ROWLAND, "Major"
Middleburg, N. C.

Electrical Engineering

"Not married but willing to be."

Age, 20 Height, 5'-11" Weight, 165

Honors in Punctuality; Corporal Company D (2); Sergeant Company E; Honors in Punctuality (3); Captain Company F; Division Inspector; Member Student Branch A. I. E. E. (4); Y. M. C. A.; Honor Graduate.

This young man contemplated entering the army, but after six months preparing gave it up, as it would interfere with his matrimonial plans. If hard work will carry a man to success, "Major" has a great career ahead of him, for his ability to destroy midnight oil is exceeded by none. Owing to his simple manly beauty "Major" cuts a swath among the fair sex and many a gentle heart beats faster at his approach.

ROBERT LEE SLOAN, "Robert"
Charlotte, N. C.

Agriculture

"If ever such lived in this land,
Here he is—a true and noble man."

Age, 24 Height, 5'-7" Weight, 150

Prize Freshman-Sophomore Debate (1); Secretary and Treasurer Rural Science Club; Secretary Pullen Literary Society (2); Secretary Pullen Literary Society; Recording Secretary Y. M. C. A.; Treasurer Biological Club; Vice-President Biological Club; Exchange Editor *Red and White*; Junior Debate; Oratorical Contest (3); Critic Pullen Literary Society '13, President '12; Local Editor *Red and White*; Associate Editor 1913 *AGROMECK*; Class Historian; Division Inspector; Treasurer Y. M. C. A.; President Biological Club; Senior Debate (4); Biological Club; Rural Science Club; Pullen Literary Society; Brag Society; Country Gentlemen; "Company Q"; Chi Club; Cowpunchers; Hornets.

"Robert" is a hard, earnest worker and deserves as much credit as any other member of the class, having worked his way through college, and at the same time made good in his studies. This man would stand by his convictions even though the whole world were against him. This quality along with his energy and clearheadedness has made him a leader in various student activities. But he has not expended all of his energies in his college work, for we find him no less ardent in his attentions to the ladies.

FRANK CLARKE SMITH, "Fido"

New Bern, N. C.

Civil Engineering

"Wise to resolve and patient to perform."

Age, 25 Height, 5'-6 $\frac{1}{2}$ " Weight, 135

Track Team (2); Track Team; Class Football Team; Winner of Medal for Cross Country Run (3); Track Team; Winner of Medal for Cross Country Run (4); Pullen Literary Society; Y. M. C. A.; Civil Engineering Society; Honor Roll for four years.

When you see this little man wearing a monogram sweater you may be surprised. But watch him on the track team and he is convinced. He has captured medals for cross country runs, and defeated the best of them in the track meets for the two mile run. "Fido" is a steady worker in all of his studies, and each term's close finds him with a clear record and good grades on all of his work. He is a weighty counselor in the class meetings and possesses the courage of his convictions. However, his eligibility for the "Woman Haters Club" is seriously questioned by all of his classmates. We have no fear for "Fido's" success in life or love, as he can show the goods.

COLIN GEORGE SPENCER, "Spence," A Z

Asheboro, N. C.

Agriculture

"A bull I'd be throughout the land,
A scholar, athlete and ladies' man."

Age, 21 Height, 5'-9" Weight, 170

Scrub Football Team; Class Football Team (1); Class Football Team; Captain Scrub Football Team; President Sophomore Agricultural Class; Marshal Oratorical and Declamatory Contest (2); Varsity Football Team; Chairman Social Committee Y. M. C. A.; Published College Calendar; Y. M. C. A. Cabinet; Chief Marshal Commencement (3); Varsity Football Team; Chairman Biological Social Committee; Secretary and Treasurer Athletic Association '12; President Senior Class; Associate Editor 1913 Agromeck; Y. M. C. A.; Country Gentlemen; Glee Club; "Company Q"; Chi Club; Leazar Literary Society.

"Spence," as he is generally called, is one of the most popular boys in his class and deserves to be, for he is very versatile and takes part in all college enterprises. His specialties are singing and playing football, but he has not neglected his study of agriculture altogether, and some day we feel sure that he will make good in this line. When it comes to playing football he is right on the job, and as a member of St. Mary's choir he has proven himself efficient in the art of song.

FRANK STEED SMITH, "Rooky"
Greensboro, N. C.

Mechanical Engineering

"He thinks too much; such men are dangerous."

Age, 21 Height, 5'-9½" Weight, 145

Treasurer Pullen Literary Society; Secretary and Treasurer Mechanical Engineering Society (4); Y. M. C. A.; Guilford County Club; Bingleville Club; Smith Family; Gang; Thalarian German Club.

"Rooky" came to us in our Sophomore year and for three years has done most excellent work as an engineer. He is one of those fellows that can always give a good word as he passes you on the campus. "Rooky" has a good business head. We have reason to believe that he intends promoting a car line to Boylan Heights, as it is very lonesome for the citizens to walk on dark and stormy nights. This young man hails from the "Gate City" and has great tales to tell us of this most wonderful place.

JOHN BROWN STEELE, "John B."
Yadkin Valley, N. C.

Agriculture

"Teach thy child to hold his tongue."

Age, 26 Height, 5'-8½" Weight, 150

Freshman-Sophomore Debate (1); Prize in Inter-Society Declamatory Contest; Prize Freshman-Sophomore Debate; Secretary Biological Club (2); Inter-Society Junior Debate; Chief Marshal Senior Debate; Prize Junior-Senior Debate; Rural Science Club; Corresponding Secretary Rural Science Club (3); Secretary and Treasurer Glee Club; Senior Debate; President Lenzer Literary Society (12); Critic Rural Science Club; "Company Q"; Division Inspector; Y. M. C. A. Cabinet (4); Country Gentlemen; Chi Club; Vorwaerts Verein.

"John B." was born in the little village of Lenoir, about a quarter of a century ago. Since that time he has inhabited nearly every town along the Atlantic seaboard. For what he was traveling no one seems to know, but it is thought that he will become either a salesman or a missionary to the foreign lands. Words flow from his lips with a volubility unequalled by the real "Teddy." Steele's work in the classroom has been good and he has shown untiring zeal in performing other college duties. As a winner of affections among the fair sex he is a star performer. He is a jolly good fellow and is liked by all who know him.

WILLIAM BUNYAN STOVER, "Billy,"
"Inky-Dink" Granite Quarry, N. C.

Electrical Engineering

"An arc light among the ladies."

Age, 23 Height, 5'-6½" Weight, 140

Sergeant at Arms Leazar Literary Society (2);
Sergeant Company D, Class Football Team (3);
Treasurer Leazar Literary Society; "Company
Q" (4); Y. M. C. A.; Student Member A. I. E. E.

This is the only man in college who can compete with "Windy" Hart when it comes to wearing a cigar. Can be seen every Monday afternoon on Fayetteville Street making eyes at the students from our sister institutions of learning. This is no place for a minister's son.

STANTON BANKS SYKES, "Cupid," "Bob"
Efland, N. C.

Electrical Engineering

"What is lost in velocity is gained in force."

Age, 24 Height, 6'-1½" Weight, 230

Honors in Scholarship; Punctuality Roll; Class Football Team (1); Secretary Leazar Literary Society; Varsity Football Team; Treasurer Junior Class (3); President Athletic Association '13; Recording Secretary Y. M. C. A.; President Electrical Society; Varsity Football Team; Chairman Honor Committee; Student Member A. I. E. E. (4).

"Cupid" is the big boy of the class and his heart equals his volume. When in action on the gridiron he resembles the Durham Bull and scatters invading players like leaves. "Bob" is an earnest supporter of some of Colonel Roosevelt's theories and says he will not be content until his home contains twelve sons, each the equivalent of his daddy. His admiration for the ladies makes him a frequent churchgoer and caused him to select a room facing Hillsboro Road. On account of his size he is always chaperoned by "Inky-Dink" Stover.

CHARLES BERRYHILL STOWE, "Red"
Charlotte, N. C.

Agriculture

"A great idea has struck him—matrimony."

Age, 21 Height, 5'-11" Weight, 175

Private Company D; Company E (1, 2, 3);
President Hornets; Associate Editor *Wau Gau
Rac* (4); Pullen Literary Society; Y. M. C. A.;
Country Gentlemen; "Company Q"; Biological
Club; Big Seven.

"Red" is a good natured country lad who hails from "around Charlotte" and is one of the boosters of "The Queen City." He constantly wears a smile, which he is often seen trying to wipe off but has not yet succeeded. Charlie is one of the many who don't allow their college work to interfere with pleasure, but in spite of that he has made good in his work and his sunny smile has done much to make our stay here more pleasant. His amiable disposition has won him many friends, but we fear that he has bestowed his affections so lavishly upon certain members of the fair sex that he will not be able to recover alone.

WALTER CLYBURN TAYLOR, "Kid"
Rhodhiss, N. C.

Textile

"I am little but loud."

Age, 24 Height, 5'-6" Weight, 135

Freshman Football Team '06; Scrub Football Team '07; Chief Trumpeter '07-'08; Runt Club '07-'08; Assistant Chief Rooter '07-'08; Secretary and Treasurer Tompkins Textile Society '07-'08; Thalarian German Club '11-'13; Assistant Athletic Editor *Wau Gau Rac* '11-'12; Assistant Chief Rooter '11-'12; Scrub Football Team '11-'12; Class Prophet '13; Chief Rooter, '12-'13; Business Manager *Wau Gau Rac* '12-'13; President Tompkins Textile Society '12; Commander in Chief "Company Q" '12-'13; Drum Major Band '12-'13; "Big Seven"; Y. M. C. A.

"Kid" is one of the most energetic men in college and mainly through his efforts as Business Manager has the *Wau Gau Rac* been successful this year. He has helped A & M to win many a baseball game and also football through his ability as cheer leader. He is some star among the ladies and several have expressed themselves as having experienced heart rending sighs upon thinking of his departure in June. "Kid" is never happier than when leading his band on dress parade. He with "Windy" Hart and "Vallie" Hall make up the famous "Gas Jet Trio." Upon graduating he will get an H.A. degree to the Nth power.

ALVIN CHESLEY WILSON, "Chess," "Ashley,"
"A. C." Raleigh, N. C.

Electrical Engineering

"The noble heart, that harbors virtuous
thoughts."

Age, 22 Height, 5'-11" Weight, 135

Private Company A; Honor Roll (1); Private
Company A; Honor Roll; Manager Class Base-
ball Team (2); Sergeant Company A; Class Base-
ball Team (3); First Lieutenant Company F;
Honor Roll; Art Editor 1913 AGROMECK (4);
Thalarian German Club; Student Member
A. I. E. E.

"Ches" has it all over "Mr. 'Possum" when it comes to grinning. He becomes so absorbed in playing with a milliammeter and shunt that he often forgets lunchtime and even his pipe. He is some artist, and as a baseball player is rivalled only by the great Wagner. His perseverance in the study of "The Bending Moment" led to his invention and the perfection of the "Rainbow Dip," which makes him a whole constellation among the ladies at the dances.

A Prophecy

Senior Class Prophecy

This world is a funny proposition after all. When we look back at the days spent, like our fathers' money, at college, we often wonder what has happened to all the old fellows and where they have wandered since we last met to receive our diplomas, which our esteemed and honored Faculty was so gracious to grant us in full payment for the four years we toiled and boned at our dear Alma Mater.

Yet, such is life, just one class after another, and to think that a decade has passed since we all stood up in Pullen Hall and sang, with Brother Joslyn leading, "When Shall We Meet Again?" Tears come to my eyes as I look back to the days when I had to get up at seven-twenty, go to the Dining Hall and eat a cup of coffee for breakfast, and then hope it would last until I could borrow a "jit" to get a sandwich at "Charlie's." It is sad, but what is the use to bring up things that have made this life happy and which we now look upon and wish we had done differently in a number of ways?

But cheer up, the worst has passed and we all received our sheepskins, which we have long since hung on the wall, and now tell stories of the things we did at A & M to liven up the dear old place. I can look back tonight and see the grand celebration, with all the white duck trousers of the fellows so spotless as we passed St. Mary's, and then before we crossed the Hillsboro Street bridge all polka dotted with the mud caused by the mixture of the dust and rain which came up all at once.

When the best class that ever graduated at A & M received their diplomas a little farewell meeting was held in Pullen Hall and every man promised to report to said place ten years from that date, if possible. It was a sad time—the final handshake, perhaps with some of the fellows for the last time,—and to think that we, shoulder to shoulder, had stood the trials and tribulations of the College Faculty, accompanied with the little notices informing us that we were requested to report to the Registrar and answer for the classes we missed in order to see the girls parade Monday morning. The usual excuse, "Sick," was written across the sheet and we silently passed out of the door, wondering what would happen to us next.

But say, why so sad? I looked up and the calendar caught my eye, and there in bold letters stood the date, May 25, 1923. Gee! This was the year of our Class Reunion, and the time for the fellows to meet only two days off. Great Scott! but I did have to get a hump on myself in order to catch the train.

I arrived in Raleigh on time, and handing my grip to the hotel porter strolled leisurely up the street. I looked up at the corner of the Tucker Building Pharmacy and there was old Car No. 22 coming up the street. I boarded the dear

old veteran. "Sallie" was at the throttle and "Cutie" received my "jit." I placed myself on the right of the car near the front so I could get a good view of St. Mary's as we passed. Well, we hit that magnificent structure, the Hillsboro Street bridge. I felt a peculiar sensation and then "Cutie" came forward and said, "Kid, you boarded this car to go to your Class Reunion. Well, the fellows cannot come so I am going to take you to see them. Get yourself fixed and hold your bonnet, as "Sallie" has given her "nine points."

The first city we hit was Marshall, and "Cutie" cried, "Here, sir, lives Honorable Lewis Allen Ammon, Mayor of Marshall." Yes, it was true, old "Chocolate" came out of his office and we exchanged a few stories, but he took time to tell me, before resuming his duties, that he had made a great success in the mercantile business and the people of the good city of Marshall made him their Mayor and he was trying to make them a good man. His business was flourishing in the largest building in town, and as I passed by I saw a large sign reading, "Ammons Mercantile Company, Anything to Eat and Wear."

About half way to the next city we had a hot box and who should come out of the machine shop but the old class mechanic, Andrews,—sure, Charles Sidney,—and he told me that he was getting along fine as Master Meehanic for the Meehville Machine Company and that the first of the year he was to be taken into the firm as a partner and about the same time he was going to form another partnership for life. Congratulations, old "chap," and Cutie gave her two bells.

This riding game was a little wearying, but "Cutie" informed me to be easy, as we were now to have some music; and sure enough we did. As we neared the village of Gilbert I could hear the melodious sounds from a trombone, and there was "Pie" Arthur playing one of his famous compositions for the trombone, which, by the way, allowed for plenty of slide, and he worked out the music by the assistance of the knowledge of Industrial Chemistry he absorbed while at college. "Pie" told me that he was head of the World Famous Arthur Orchestra and was having fine success, but he was sorry as he could be that he could not invite me around to the house, as Mrs. "Pie" and little "Gib" were at the seashore.

We had to leave Gilbert, as our time was short, and we next came to our old pal, Baehe. Well, he had returned to his native State, Florida, and with the assistance of his electrical engineering knowledge had proceeded to harness all of the available water power in that neck of the woods and was furnishing power for all nearby towns. Not forgetting his music, Bache had formed a band, of which he was director and played lead cornet. The power plant was a good thing, he went on to say, but it kept him from his wife most of the time.

From there we traveled to Elm City and who should we find at the ball game but Manager Roger Bailey. It was his team, too. He was manager and it was a cracking good nine. I thought I saw one or two familiar faces, but I

was afraid to say anything so I passed it up. Roger told me that farming did not occupy all of his time, so for pastime he was back in the national game and was going to win the pennant. I hated to ask him how love matters stood, as he had a failing along that line, but I braced up and popped the question, and he replied, "Not yet, but next year this time."

Just at this point I was interrupted with a slap on the back and there stood Grady L. Bain—an engineer of some note, believe me. "Gertie" was down in that section looking over the site of a terminal for the electrical railway of which he was Chief Engineer. Say, it made me feel good to see the old fellow and I believe he had forgotten that he was ever a "Rah-rah Lad," as he had the appearance of one wanting to get home to see the Madame and muchacho.

We next went to see Edwin Dennis Bowditch and we found him leaning over the iron fence that girded his country home. The chickens, dogs and cattle were enjoying the large yard, but he had the far off look of a bachelor in his eyes. So I eased him a little advice and told him to take unto himself a wife, as he was not keeping up the record of the class.

"Sallie" turned on the juice and we slid along and the first I knew we were going some and finally landed in the heart of South America. We stopped in the midst of a large construction camp, and who should be on the topmost pier of the job but old Hermon Briggs! Yes, it was Hermon Burke Briggs, of Raleigh, my beloved old classmate. I gave him the high sign and he descended to the level of terra firma and told me how it all happened. He roamed around a bit after graduation and finally hit up with the South American Construction Company with a position as draftsman, worked hard and finally went out on the job, learning all he could, and his efforts were rewarded, as he was at present superintendent of the largest job east of the Andes.

We placed the car upon the Atlantic and Pacific track and proceeded across the mountains, seeing all kinds of engineering feats that looked impossible. It was some great trip, believe me. But we finally landed in the little village of "Amosele," drove up to the electric plant to get our car looked over and who should step out of the president's office but "Amos," yes, Amos Baxter Clement, the college electrician. Amos was as fine as could be; and then—well, a little fellow ran out of the office and said "Papa, give me a 'pesto'" and I, Gee! I fell over when Amos said "Kid, that is my boy." Great Scotts! Amos married and having to give pestos to a little fellow to buy candy. That got me, but I was glad to see that he was president of the electric plant and that he had harnessed all of the available water in that section of the woods. He told me that Sir Keith Keller was the man who built the railroad, but at present he was in the States taking unto himself a better half. That sounded fine and I was sorry as could be that Keith was not around, so I could clasp his fist and have a little

chat with him. But a fellow will do anything for the sake of the ladies, so I had to leave without seeing Keith.

We proceeded on with the car and came up to the Panama and there was William Randolph Clements, E.E., in large letters across the door. I went in and asked for the above mentioned gentleman and his private secretary asked me to have a seat, as the "Captain" would be in in a very few moments. Well, the old boy came in and he was some good looking sight to see after so many years having passed and I not having seen his beaming countenance. We had a little chat and Willie went on to tell me all about himself, and I was glad the old boy had out his shingle and was hauling in the "cash." Willie was not much of ladies' man but he was pretty strong for some fair Spanish damsel. It seemed as if all the fellows were getting themselves in trouble, but I could not help him a bit, as it was a pretty desperate case. Willie boarded the car with us and we crossed into Texas and there found "Billie" Cole.

Billie, the farmer, was sitting on his porch enjoying the cool breeze. He called the Madame and told her to put a couple more plates on the table as there was company for supper. That sounded good, as I knew that boy had a wife who was some cook, as he made that statement while at college. So I was sure she knew how to have good things to eat. We swapped a story or two and then went in to the feast. I will call it so, because it was the best meal I ever tasted. The night and part of the day was spent with Billie, as it took a long time to get over the ranch to see all of the improvements and features that were on the place. His years at college were very profitably spent and Billie Cole was the best loved ranch man in that section.

Willie left me at Billie's, so "Cutie" and I were off in the old boat together. That sure was some car and I was afraid she would leave us and go where all good ears go, but "Sallie" only smiled, so we hit it for Colorado. There we found Dail, from Chinquapin. He had a shingle out of his window, stating that he was a chemist and glad to analyze anything at any time, and also did a little insurance business as a side line. I had my life insured and we sailed back to the dear old Dixie Land and hit Fremont. There was Paul Dexter Davis out in the street giving a gang of men Hail Columbia about the car track. Sure, Fremont was to have a car system and "P. D." was the engineer. He located at home after graduation and was so trustworthy and popular that he was made City Engineer, and as the town was building its own electric line, he was the main guy.

We placed our car on the Norfolk Southern track and rode to the fair city of Elizabeth City, where Bart Fearing resided. Bart was single but very prominent as a business man and had a third interest in the largest store in the town. His chemistry he was using to analyze accounts and hearts. But he was not as good at the heart line as in business, as he could not find one who would be all "Fearing."

From Elizabeth City we eased into Norfolk and there "Private" Floyd was, coach of the A & M football team and getting ready to play V. P. I. No, it was not Thanksgiving, but he was there as strong as could be and his team showed up excellently against the Virginians, who were not in the class with the "Aggies." After the game "Private" and I had a little confab and he told me that he was coaching in the fall and at other times he was draftsman with the shipyard at Newport News, but that it took most of his time studying out plays. We loafed in the large city for a while and then hit it up State and there found Goodman in the largest apple orchard in the Old Dominion. Goodman was some farmer, but his mind turned to fruit and he loved apples. But his real love was tied up somewhere in North Carolina, the exact location I could not figure out, having only a limited amount of math, with which to make the necessary calculations, but I did find out that it was going to develop into two living as one pretty soon.

Now there was one man in our class who was in love while in college. It seemed strange that all of the fellows were married or about to fall. But what could you expect of a bunch of fellows who graduated and their numerals were "13"? Cicero Gore was among the unlucky. He married soon after graduation and I remember how he used to tell me about the trips he made to Washington, and there he was in Richmond as Assistant City Engineer, with his wife and family to comfort him in his old age.

"Slick" Gwathmey was a little different, as he—well, Gwathmey was a good student. He entered the Government service and was getting ready to sail for the Islands, where he was to be in charge of the construction of one of the largest dry docks in the East. He did not fall as some of the fellows did, but remained true to the cause. He never seemed to be able to figure out which one would share the hardships with him.

At this stage of the trip "Cutie" called to me and said, "Let's go to North Carolina, I am tired of Virginia." So we crossed the line and who should we run across but old Felix Hales. We took him on board and he told the following story: "After graduation I went to Cornell and there specialized in Drainage and Municipal Engineering, and then went to Statesville. The rest of the story you know. I am married and as happy as can be, and am a pretty good City Engineer. But there is nothing like this married life."

We left Felix there and rode on. One of the sights that hit me as we neared Greensboro was the suburb called Guilford, and there I found Charlie Ganzer Hall. Charlie was "Super" of the largest mill of the town and was true to the cause, but he could not get the necessary amount of words together to tell the lady how much he cared for her and wanted me to play the John Alden act, but I "releged." So I left him to suffer, but later I heard he popped the question and there were now two "Supers" of the mill, or at least Charlie had a boss.

Old "Elsie" Hand did not fall for the mill game but went to the fair city of Chadbourn, and there engaged in the mercantile business and succeeded well, but made most of his money with a little invention which he called "The Hand Snoozing Powder," guaranteed to make you sleep all the time. I asked "Elsie" about old "Windy" and he directed me to Monroe.

As I came to this progressive city I saw a large sign reading "The Hart-Purcell Spindle & Flier Company, Home Office." Say! That was some sign and there was Thomas Roy Hart standing out in front of the building wearing a large cigar, with Senator Purcell looming up in the distance with a chug-chug and a honk-honk from his much talked of motoreycle. Windy placed the foundation for his spindle and flier business during vacation after his Junior year at college, and he taught it to "Moon Face" during the Senior year. The two had formed the combine and were doing all the business they could possibly handle, "Windy" taking a little vacation every now and then to elucidate the fine points of the teams that used to be at A & M.

Sallie gave the old boat the juice, after we borrowed a little oil for one of the bearings. We landed slam in the heart of the wild and wooly sticks of Goldsboro and there found Major Thomas Jasper Hewitt. "Tubbie" was some engineer and was working out the ratio between the job of editing the AGROMECK and working out in the woods and never seeing any fair damsel. He had found the exact proportion and was getting his data together to go to the city of Washington and claim the answer. He was like the rest of the bunch. Poor fellow!

We put him on Pullman Number 22 and sailing along came to a small place with the sign, "Cross Roads, this road goes to Higginsville." My! But that was strange, but we followed it and who should stop us for speeding but the Sheriff, and when the whiskers came from behind the star on the lapel of his coat "Tub" and I recognized Higgins, our dear beloved classmate. "Kibe" was some officer, but he informed me that he was only working extra as he did not have much to do on his farm.

Two bells and we passed him by, but we did not journey long until we hit Peter Holt. He was leaning over the split rail fence of the barnyard admiring some fine young horses. They were as pretty as could be and Peter was directing the care of the full blooded Arabians. We exchanged greetings and "Tubbie" stopped here, as he forgot to tell me that he and Peter were going back together and have a double ceremony.

At this place Sallie turned, as we had to come back to Raleigh and put a red light on our car, as they have them all on the cars now and red means Hillsboro.

We started again and near Natural Bridge, Virginia, we found "Sis" Hopkins out surveying the ground for the erection of a country home. "Sis" was some Civil Engineer and he with "Bill" Simpson had formed the "Sis-Bill Construc-

tion Company and "Sis" was retiring from the field on account of his health, as the woods and wild places did not fit well with his body, so he was to take charge of the home office in Richmond.

Hopkins told me that he had to go to New York, so we put him on the car and hit the ball. While en route to the "Great White Way" "Sis" told me that Dug Jeffrey was in the Islands working for the Government, but would be home some time soon, but while in the Islands he had coached the football team of Manila University and had made good.

At Philadelphia we found "Rubber" Jeffress in charge of the Southern business for the Quaker Electric Company. His position gave him many chances to visit the city by the Gulf, and when he made these journeys he always returned with a very broad smile, and on the next Southern trip he was going to bring the Louisiana lady back with him.

"Rubber" told us that J. W. Johnson was in town a few days ago buying supplies from the Quaker people for the Garland Power Company, of which he was Vice-President and Manager. I was sorry as could be that we missed "J. W.", as I wanted to see him, but he was still single and the prospects for married life were very poor.

Our motor was running badly, so we eased over to a branch of the "G.E." to have our bus looked over, and who should come out to superintend the installing of the new motor but George Edison Kidd. George went to the "G. E." people soon after graduation and made good. He was in charge of the Electric Car Motor Department, so of course he looked after our job.

We then beat it for New York, arriving on Broadway in time to attend church, having not forgotten the habits we formed while at college. Who should we see in the pulpit but Harvey Langill Joslyn telling in very flourishing terms about the soul of the Filipino. He was a missionary to the Islands and was sent out by the Y. M. C. A. of A & M, and was telling of the ways and hardships of the people.

At the "Welldoff-Gaston," where we had dinner, who should we see across the table from us but "Lewis" Knight, and he was with one of the prettiest specimens of calico I ever saw. He recognized us and invited the bunch over to meet Mrs. Knight. They were on their honeymoon. There went another who deserted the bunch to get married.

After dinner we crossed to Brooklyn and there in the largest drug store in town was Maurice Liferock reading an extra edition of the *Hau Gau Rac*. The headline stated that A & M had defeated Carolina sixty-eight to nothing. Liferock was a civil engineer but he did not like the work, so saved his money and rose to his present position as sole owner of the Brooklyn Drug Company.

It seemed that the A & M graduates had a kind of meeting place every Sunday afternoon with Liferock, and who should come in but R. S. Mauney. He was

city salesman for the Westinghouse people and was doing fine, but all the time he was a confirmed bachelor.

R. T. Melvin came in to purchase some seed for his farm in the White Mountains. He wanted to raise some kind of stuff and came to the drug store to get the necessary wherewith, as Liferock had anything in his store for man or beast.

He told us that old "Snail" McComb was in town and so we sent a "taxi" for "Snail" and had him to come and tell the crowd about the large job he was constructing for the "Thunder and Lightning Power Company" near the city of Hickory. "Snail" looked worried and we asked the trouble and he said, "Fellows, I just saw the prettiest woman in the world. I would marry her today if she would have me." Same old "Snail," loving the last one he is with or sees.

After a short stay in the city of New York seeing the sights we got our little things together and hit it for the West. We came to the city of Albany and there found Lewis Merritt with an office in the State Capitol, with a sign on the door reading, "L. L. Merritt, State Geological Survey." Lewis, after graduation, like a number of the fellows, went North and made good; thus the name plate. We exchanged greetings and he wanted me to stop over and have dinner with he and his "Jane," as he used to call her at college, but I was sorry as I had an important engagement in the Windy City to see the Stock Yards with Tim Nixon. In a short time we arrived in Chicago and found the above mentioned personage busily engaged as head Veterinary at the Union Stock Yards. "Tim" decided that Veterinary was the best after all, so he spent a couple of years at Kansas City and completed his course and he is known over the entire West as one of the most celebrated administerers to the dumb brute in the country.

In passing up Main Street to the hotel who should we see but Thomas Kenneth Mial, of Raleigh. "Icky" was in the Windy City looking over some stock to buy for his large farm near Raleigh. He decided, after graduation, that it was a great deal more profitable to do the mechanical work on his farm and to draw lines over a mule's back than to work out in the wide world. "Icky" having nothing special to do, I prevailed upon him to get on his "old pal, No. 22" and have a ride with us, as we would give him a good trip.

Cutie received the orders, gave Sallie the signal and we started for the Pacific coast. We came to Yellowstone Park and there found Walter Herbert Parker doing some special work for the Government. What he was doing I could not exactly remember, but it seems that he had been working for the Government and had some extra fine calculations, which proved to be the result of the working out of the amount of water that was flowing from the geysers, and as a reward for his untiring work along this line he was now getting together the necessary data to figure how long it would take the water of the Pacific Ocean, flowing at a rate of the Great Geyser thru a hole the same size, to empty into the Atlantic

Ocean, and also how much oil would have to be used to oil the wheels of time. We wanted to take "Bessie" with us, but a man with all that work did not have time to go on a joy ride, so we left him to his fate.

From there we landed in Seattle, Washington, and found "Thad" Parrish, City Electrician. He had somewhat of a roaming disposition and having been all over the whole world and following the electric game all the time, finally settled on Seattle as a place to make his future home. He was married and had a very pretty little lady at his home who wanted to know all about North Carolina, as she said, "That's where 'daddy' used to live."

While traveling down the coast I looked out of the window and saw a very familiar motorcycle, which I soon discovered to be the property of one Thomas Hector Purcell, and the above mentioned "Senator" was driving the muddy steed. I hailed the "Senator" and he with a smile as broad as could be upon his moon-faced countenance stated that he was touring the West for his health and was having a lovely time; that he left Monroe the day after we did and was now returning to his farm, as he had a lot of work to do there and his Reaper had to have a new gear, but he had one he found while at college.

Mial left Cutie and I at Portland, so we went to San Francisco alone, but there found Henry Aubrey Quickel. "Babe" was in the service of the Pacific Wireless Company and was in charge of the main office in 'Frisco. He followed the mill game for a time but the love for the telegraph key called him and he responded, getting into the wireless side. He liked the game fine, but said that there was one call that worried him to death at night and it was generally followed by a walk, intermingled with yells. He laughed and writing it on paper said, "Here is the call." I read, "P-A-P-A."

Quickel and I went down to the wharf and who should we see getting off a Government transport but Captain John Olan Rankin, Jr., of the Philippine Constabulary. Soon after graduation "Jonnie" went into the service and his promotion was rapid. He was now home on a furlough and from the smile he was wearing and the hurry he seemed to be in to get to Gastonia, "Babe" and I decided that some girl was the cause of the trouble. He would not wait to come back with me but hopped on the first cross country airship and beat it for Charlotte.

We left the coast and came to Fort Leavenworth and there found Lieutenant Garland Thomas Rowland, U. S. A., Officer of the Day. Yes, sir! Major was in the service and he was proud of his office as could be, and tapping me on the shoulder said, "Kid, I sure had to work to pass that exam., but it is worth it, and I am soon to be a Captain and then I will have to go to the Islands, but I am not going alone."

As we neared Columbus I saw a very large and tall skyscraper under construc-

tion and a massive sign reading, "Sis-Bill Construction Company, Home Office, Richmond, Virginia." My! I nearly fell off the old gondola, but I went up to the plant and asked if Mr. Bill Simpson happened to be in the city. I was informed in the affirmative by a slap on the back and the words, "Bet your life, Kid, I am right here and I want you to meet my wife." I looked again. She was a tall blonde of the North Carolina type.

The porter made down our berth, so Cutie and I went to sleep and when we woke we were in Charlotte and there found Robert Lee Sloan, happy as could be, as he had raised the largest watermelon in the county and was so happy he could hardly see.

About that time "Fido" Smith came up and he had to tell us about himself and what he was doing for the good of the people. He handed us a card which read, "F. C. Smith, representing The Greater Charlotte Improvement Company." "Fido" stated that he was in charge of the improvement of a piece of property near Charlotte and hoped to get a good bit out of the deal, and as a side line he was trainer and coach of the city track team, which was to compete with the other teams of the State, and his team was sure of a good place in the lead if not to win.

"Fido" left us and I looked around and who should I see coming up the street but Frank Steed Smith, and believe me, he was coming some in a great big racing machine. I gave "Rookie" the high sign and he slowed down long enough to tell me that he was in the auto business and now he was on his way out to the "speedway" to try out his "Thirteen Cylinder Kerflunk." But he said he would see me when he came back, so I saw him throw in the clutch and beat it for the track.

While standing at the Square talking with Cutie who should appear on the scene but Colin George Spencer. He looked prosperous and in answer to the question as to how he was living, he went on to narrate: "Well, it happened this way, after graduation I went on the road but I did not like it, so settled down at home, Asheboro, and there went into business with the experience I acquired while at college, and I am here buying goods. I have never married, as I don't seem to be able to connect with the proper one, but I will tell you this much, it is not because I sing to them."

Spencer and I strolled down to the hotel and who should we see tacking up the street but John Brown Steele. He was in town from his apple orchard up in the Yadkin Valley and was trying to sell a carload of what he called "Steele's Yadkin Beauties." I asked him how he loaded the apples and he related as follows, "Well, you know it is pretty hilly up where I reside, so I have all of my trees on the side of the hills and the railroad runs along in the valley, so when the time comes to load I get all of the ears I need and fix the chutes to the doors and

then the scientific work begins. I put men at work shaking the trees and the apples roll down the hill and right into the cars." I winked at Spencer and we congratulated him on his fine management, and he wanted to know what we were laughing at. But we had to go, as Spencer wanted to get back home as he was going to sing a song.

I met Cutie at this point, so he decided that we would take Spencer home and on our way back stop at Granite Quarry to see Stover. As we arrived in the limits of this thriving little village, I saw a blue light ascending to the heavens and I asked Cutie what it was and he replied that he had not the slightest idea. So I said, "Let's investigate." We did and who should we find at the seat of all this light but old Stover. We watched him for a few minutes and then I said, "Look here, William Beaver, what art thou doing?" "Talking to Mars, my kind Kid," he replied. And so I had to get in on it myself, as he could not have all of the gas on that deal. So he explained that while at college he made several little experiments on the quiet and now was getting them arranged so as to prove that Mars was inhabited. And when he did all of the world would shout, "Great Stover!" It looked nice, all that funny wiring and so on. But nixie for mine, so I headed for Charlotte, as I had a little work in my office. And who should I find there but Stanton Burke Sykes waiting to get me to sign the contract for the wiring in the new mill I was having built. Sykes went into the contracting game and being able to take a lot of punishment from the big ones, finally was on the last part of the ladder and his business was increasing every year and he was making money, but did not have time to get a wife.

Sykes and I swapped a few stories and then he said, "Kid, come get in my car. I want you to see a happy family." So I eased out and placed myself in the electric and we went out into the country over the macadam to beat the band. As we neared a large country mansion, "Cupid" said, "Kid, be real quiet and we will slip up and look in the window." We did, and, well, I nearly gave the thing away, but I did manage to calm myself, and there I saw a beautiful picture. "Reddie" Stowe was seated in a great rocking chair, a large cigar in his mouth and a little bundle in his arms and he was humming a very familiar tune, "Sleep, Little One, Sleep." Great Scotts! But that was a blow. We laughed out loud and "Red" said, "Who are you?" We made ourselves known and then he told us that he did not intend to get married but it was so lonesome on the farm that he had to do it. And the little lad was redheaded, so we dubbed him "Little Red." "Trainer" and I departed after a good time with "Little Red" and daddie.

I caught the car for Raleigh and on the way found Alvin Chesley Wilson in charge of the power plant at Rockingham. "Ches" stated that he went with

the Carolina Power Company and they at present had him out here serving as an extra man, but he would be back in Raleigh in a few days.

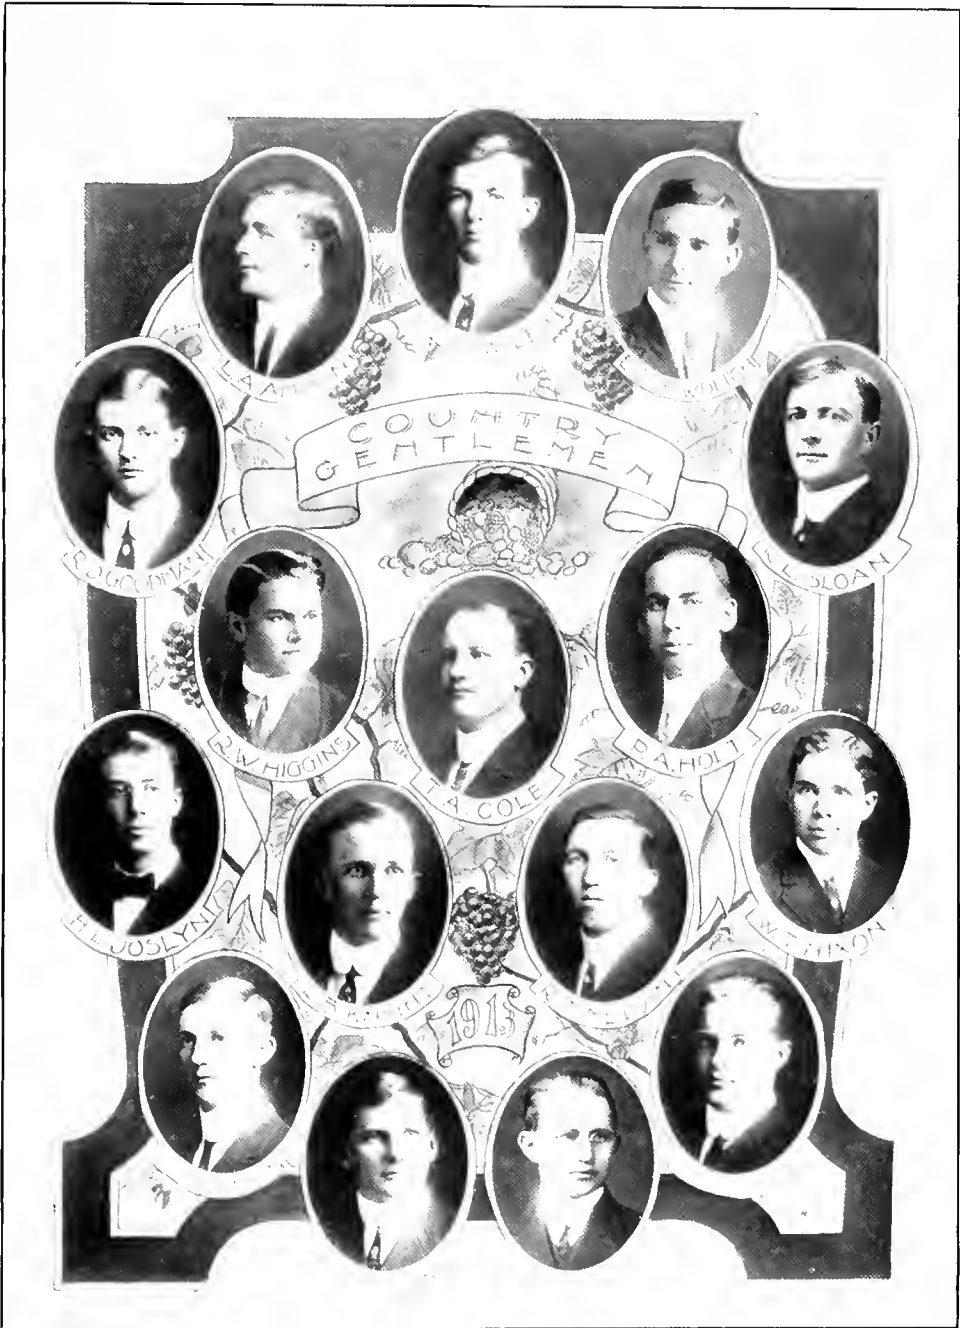

I bade "Ches" goodby and we started for home, and I began to feel kind of funny and said to Cutie, "Look here, old sport, this trip has about put me on the bad." "But my, Doctor," some one said, "he will be all right in a few minutes." I opened my eyes and there was P. B. Ferebee standing over me, and I—well, I looked around and I was on a cot. How I got there I know not, but "P. B." told me that the car went through the bridge and that I was knocked unconscious. I asked him what he knew about it and he said that he was Superintendent of the car system now, and recognizing me, came to the rescue. "But, say! Hurry and get up, 'Kid', as the fellows are all at the college for the Reunion, and you are late."

Last Will of Senior Class

OFFICE OF RIP'EM & SLIP'EM
 OFFICIAL CLASS GRAFTERS
 WEST RALEIGH, N. C.

STATE OF ADVANCED MISERY }
 COUNTY OF NEVER WAKE } VILLAGE OF WEST RALEIGH

To all whom it may concern—Salutations:

We, the bunch of fellows who have been known as Seniors for the past year, having arrived at this stage in life when we from College Life do depart, do affirm and declare we are of sound mind and body, and being in that state of misery do bequeath and donate, also thrust upon the organizations, persons and other things hereinafter mentioned, the following articles to be used and done with as they see best:

First and Foremost, We do hereby surrender the tract of land known as the A & M College, situated in West Raleigh, bounded on the north by Imagination, on the east by the interrogation, on the south by nothing, and on the west by the other side of the question mark, to the Class of 1914.

Second, Knowing that the winters of West Raleigh are very cold and sometimes raw, we take this chance to give to our dearly beloved Dean, Doctor Harrison, the following: every solitary Gemung English Book used by the Class of 1913 during their Junior year, and we hope the dearly beloved Doctor will, on these rough nights, take the above mentioned articles and thrust them head foremost in his furnace, and that the heat derived therefrom will enable his cold heart to warm a little while he is correcting Junior English papers; that the heat will overcome him to the extent that he will be unable to flunk a man and also, above all, none of the papers will be "wishy-washy."

Third, To our honored and esteemed President, Doctor Hill, we, with all the reverence due his high position, hand to him all reports made by the members of the Senior Class "ramming" lower classmen for being downtown. But we put one proviso, thusly: this mammoth amount of reports does not include those of the Major. In view of our generous gift to the Mighty President, we do ask that he put these dearly beloved reports in the boilers and that he will be able to cut down the expenses of the College at least one mill, as we are sure the heating units of these reports will generate and keep steam in the dormitories at least one one-millionth of a second.

Fourth, To our true friend, the Registrar and *Protector*, Mr. E. B. Owen, we give the exquisite pleasure and privilege of erasing our names from the Conduct Book and crossing our names from the College Roll, but remembering at all times that we fellows dearly love to think of the care and consideration he had for us while at College.

Fifth, To Professor W. A. Withers we give innumerable thanks for the grand little "ditty," "Promptness is a Rare Virtue," and do assure our dear Professor that we will always follow his advice through life, as he has done.

Sixth, To Mrs. Harris, our College Mother, we hope that all classes to come will give her no more trouble than we have, and we sincerely hope she will remember always that the members of 1913 Class thank her from the bottom of their large hearts for the many and many touches of tenderness she has bestowed upon their fevered brows when they have been under her care. We also trust that in a very short time she will have a new building in which to take care of her boys.

Seventh, To Mrs. Holman we do with great gratitude thank her for the care she has taken in seeing that our food was served nicely and cleanly.

Eighth, To the Boarding Department we give back all beef we could not chew. Amen.

Ninth, To the Literary Societies we give all speeches. To the German Club all girls we do not take away with us. To the Rooters' Club all the noise possible, and may they win all the time.

Tenth, To Captain Peace, one AGROMECK, and good luck and best wishes of the entire class for a speedy promotion.

Eleventh, Having in the beginning given the College to the Class of 1914, we do hereby extend to them all the privileges of Seniority and do sincerely hope they have in the past three years profited by their experience and know what is expected of them.

Twelfth, To the lower classes we extend our congratulations for having stood by the good ship A & M as you have, and we hope you will do so henceforth. And as you are now older, we hope you realize what is expected of you by the folks at home. Especially to the incoming Sophomore Class do we extend thanks for showing their true A & M spirit and hope that they will always be proud of the fact that they started a custom that will last for ages.

Thirteenth, Some people being of a funny nature and always seeing things when they are sober, we do take pleasure in telling you that "13" is not such a bad

number after all. We have been working under it for four years and have found it to be a very good pair of numerals.

Fourteenth. Under this heading we, with regret, give the right to some of our classmates, who could not drive their ponies as well as we, a place with the "14" Class, together with our sympathy. We hope they will have a safe journey and come out on top.

Fifteenth. To the new class preparing to enter: We welcome you to the dearest place in the State, and do hope you will all pass off your work as it comes up and that you will all be true, honest A & M men.

Sixteenth. In conclusion, as we are now about to leave you for parts unknown, we hope that some day we will all have the pleasure of meeting again, and when we do we will all join in and give a snappy *Wau Gau Rac*.

Yours with best wishes,

Attest:

THE 1913 CLASS.

"The Tie That Binds"

Juniors

Junior Class Poem

Among Carolina's hills on a summer's day,
Where nature had bedecked with its wondrous display
Of flowers and verdant trees the fields about me,
My thoughts went back to our class of one and four,
The class we so honor, the class we adore,
As I looked about me, I saw a little stream
Winding its silvery form through a small ravine,
Finding its way over treacherous rock and rolling stone;
Thence flowing on in its more tortuous course
As its tributaries made of it a mightier force,
To its goal, the great blue sea.
So we, like this stream, are striving to reach our goal—
The attainment of such knowledge as will give us control
In dealing with life's problems as they come our way,
And may we always continue, like its flow incessant,
To attune our hearts to our work that it may be pleasant,
And may we like the stream in its never dissociating course
Be ever loyal to our class, tending not to disperse
Before another year has passed by,
For by working together we may with our work progress,
And become men of high standing in the world at its best,
So here's to the class of the orange and blue,
The emblem of loyalty and all that is true,
May its colors ever intermingle with the red and white
As a symbol of good fellowship to every man
Who works among us at A & M.

Junior Class History

We have now reached the third stage in our college career. As Freshmen we were fresh, and as Sophomores we wore the lordly air of sophistication so dear to the hearts of all true Sophomores. But now we have thrown aside such childish things and assumed the dignity and courtliness of Juniors. As such it would ill become us to take part in the frivolous tricks which, as Sophomores and Freshmen, were not beneath us.

Although many members have dropped out since we entered as Freshmen, we still have a large class, in fact the largest Junior Class there has ever been at A & M. Some few have joined our ranks from previous classes and from other institutions. To these we extend a hearty and fraternal welcome.

Early in the history of our class we began winning athletic honors. Although our football team lost to the Sophomores in our Freshman year, we secured revenge by defeating the same class for the baseball championship the following spring. In our second year history repeated itself. We lost in football to the same class, but again won the baseball championship. Captain Foster did the twirling for the second time. This year we won the football championship, winning from the Sophs and Freshmen both by the score of 6 to 0. Foster was again captain and led his team well. This makes three championships out of five that our class has won, a record that we are justly proud of.

Besides winning honors in class athletics we have had many stars on the Varsity teams. In football we have had Cool (Captain), Anthony, Plyler, Morton, and Phillips. In baseball we have had Farmer (Captain) and Patton. In basketball we have had Chambers (Captain), Austin, and Phillips (Captain). In track athletics Melver, Kephart, and Nash have won monograms.

We hope to have most of our members back next year and graduate with full honors.

HISTORIAN.

Sophomores

Sophomore Class Poem

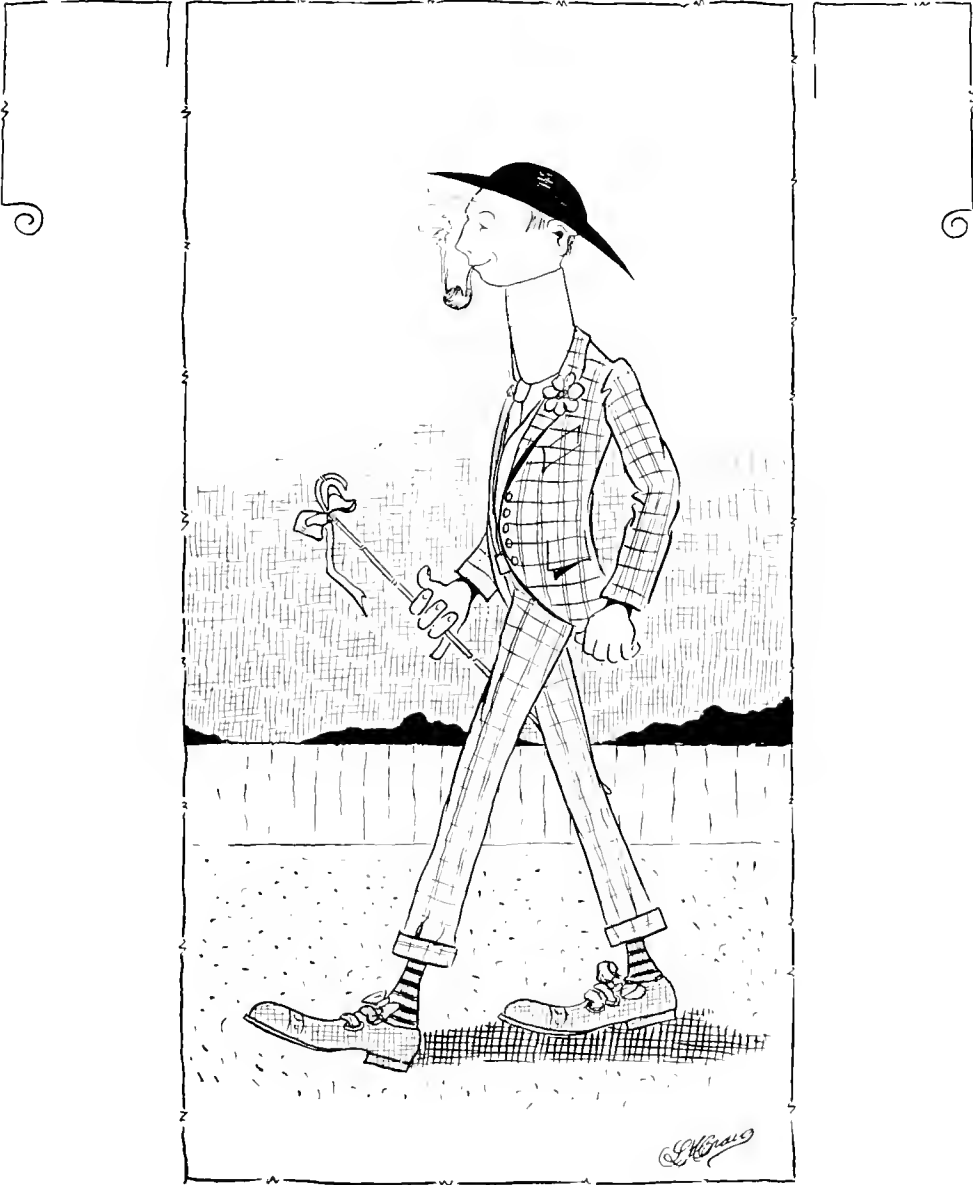

Our Freshman days have passed,
Distinguished Sophomores at last;
Loud socks and neckties, with smiles,
We're wearing regardless of styles.
No longer questions do we ask
That'll class us with growing grass.

Some of the Freshmen are rather smart,
But hazing we dare not start;
For when a poor Freshman we wet,
Dr. Hill said, "Enough, you must get!"
The faculty says we must not harass
The distinguished, adorable, Freshman Class.

In athletics we have met defeat,
But from integrity we shall ne'er retreat.
Ever loyal to our college and class,
We hope all others to surpass,
When our college work is done
A great and glorious victory won.

Sophomore Class History

If by good fortune anyone had happened to be on the campus of A & M on the seventh of September, 1911, he might have seen numerous peculiar human beings, some with a look of longing for home and mother, others with a look of full enjoyment of their surroundings, all of whom were dubbed with the verdant name of "Freshmen." It is correctly reported that never did a bunch more visibly merit the name, for it was the embryo of the Class of 1915. Ours was the largest class ever registered, as we numbered one hundred and sixty-two. Our first month of college life was spent in learning the way to the Postoffice and the Y. M. C. A., "Doc. Byrd's," and "Downtown." We also had the pleasure, if pleasure it may be called, of learning how to "Right Face" and other military contortions. Usually our slumbers were very calm and undisturbed, except by a certain melodious (?) whistle, which had a regular habit of blowing every morning at seven o'clock sharp. However, the dreaded "Sophs" were unkind enough to rudely disturb the slumbers of several ignorant Freshmen. Taking everything into consideration our Freshman year was a very pleasant one, although we were all glad when it was over and we could claim the proud name "Sophomore."

In September, 1912, we began our career as "Sophs," which so far has proved very uneventful. As we look over our class roll, however, we find that we have lost about fifty-eight of our men, who for various reasons have fallen by the wayside. The election of our class officers resulted as follows: B. W. Setzer, President; I. T. Lewis, Vice-President; D. Dailey, Secretary; R. P. Harris, Treasurer; T. W. Huntley, Poet; and the writer, Historian. We were represented on the Honor Committee by J. F. Brawley.

While we have not had any signal success in athletics, we put up some very good games. F. K. Kramer ably managed our football team, while D. Dailey was Captain. "Jimmie" Hassell was fortunate enough to make substitute on the Varsity football team, and several others made the "Scrubs." We have been well represented on the basketball team by Wilbur Sumner and T. W. Huntley, both of whom have played star ball. I. T. Lewis and B. W. Setzer were elected assistant managers of the football team for 1913. We are represented in the literary life of college by Mr. Setzer, who is Secretary of Leazar Literary Society.

The Freshmen have suffered but little at the hands of the "bloodthirsty" Sophs, not because of their virtue but by reason of the fact that we are otherwise restrained. Nevertheless several of them are about ready to graduate from the "One Year Water Carrying Course." Several members of our class have shown a decided inclination for "Sign Painting." The "Tank" is adorned by a large "15," and the work would no doubt have been better had the painters not been disturbed by a bunch of Seniors, who for some strange reason were in the immediate vicinity of the "Tank." Doubtless many passersby have been puzzled at the immense "5" which may be seen on the roof of the new barn. There are conflicting reports as to why the "1" was not added, but it is very evident that the artists put down the "5" and are carrying the "1." Better luck to our followers!

As our Sophomore year draws to a close we begin to feel the dignity which is befitting to a Junior, and we are drawn closer together by the bonds of fellowship and day by day we learn the characteristics which are peculiar to each and every one of our classmates, whose names will long be remembered in the history of dear old "A & M." Naturally believing that the Class of 1915 is the greatest in the history of the College, we can then look back and say with pride, "I was a member of the Class of 1915."

Freshmen

To Old Sol

(BY A MISERABLE FRESHMAN)

Shine on, bright sun, shine on!
Light earth and heaven above!

Shine on!

What though I'm hopelessly in love,
What though she loves not me but him,
What though my prospects now are slim
For passing Math or even Chem?

Never *you* mind!

Shine on!

Shine on, old Sol, shine on!
Through ages yet to come,

Shine on!

'Tis true I'm sick to see my home;
'Tis true my girl has cut me dead;
'Tis true I owe for Hurley's bread;
But don't let that go to *your* head,

Never *you* mind!

Shine on!

Shine on, O sun, shine on!
Bless field and stream and town!

Shine on!

Too soon the Dean will call me down;
I have "conditions" not a few;
My laundry bill is overdue;
But don't let that unsettle you,

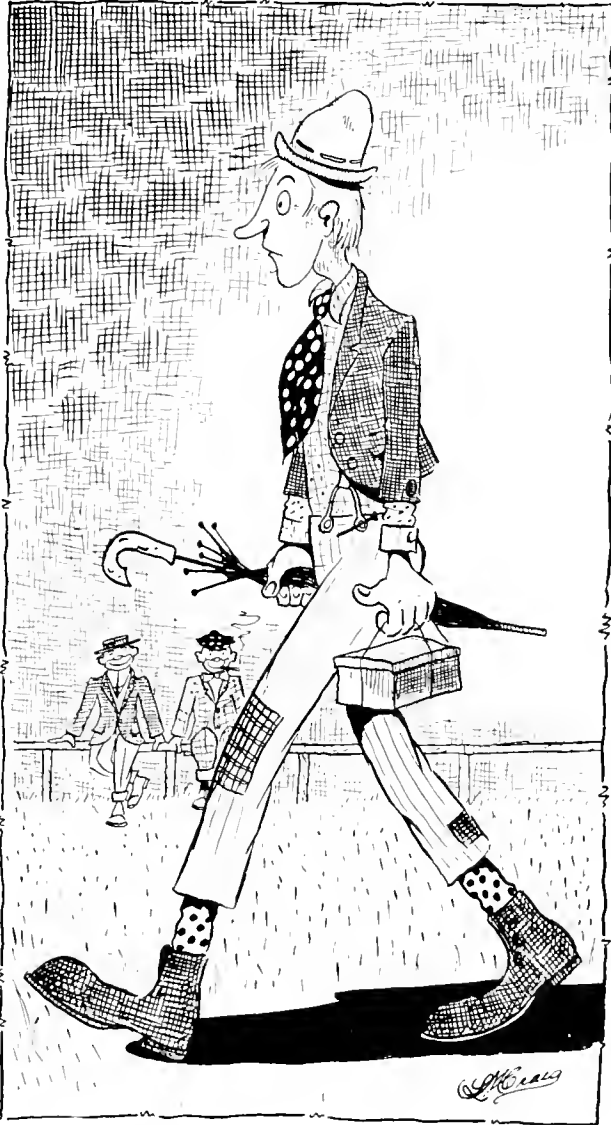

Never *you* mind!

Shine on!

(*It shines on*)

Freshman Class History

On the seventh of September, 1912, there were registered something like two hundred and twenty-five new students, which now comprise the Class of 1916. We were the largest class that ever entered A & M. But in spite of our numbers we were as green, if not greener, than any other Freshman Class. We bought butter cheeks, bathtickets, and our radiators from the Sophs, and made all the usual blunders that every Freshman makes, and then made some more.

On registration Thursday we were relieved of most of our money and assigned to our rooms. After the first few days and sleepless nights (sleepless through our fear of the Sophs) we began to get accustomed to our surroundings and feel more at home: for by this time we had been assigned our respective classes and companies. We found that the Sophomores had no "visible" desire of taking our lives; in fact I don't believe any Freshman Class was ever treated so well as we. Whatever fears we had left were dispelled on "College Night," a reception given to the student body by the Young Men's Christian Association. At this reception we were told of the different phases of college activities and were given an opportunity to meet the older men.

About the middle of September we held our first class meeting, electing a temporary President and Secretary for one month. Later the following officers were permanently elected: C. J. Pruitt, President; P. A. Roberts, Secretary; H. K. Herman, Treasurer; J. C. Collier, Poet; L. C. Holt, Historian. C. A. Ledford was elected to represent us on the Honor Committee; G. L. Lilliard was chosen as manager of our class football team, and J. F. Cates, Captain.

Just after chapel one morning the Senior Class in a body met us in Pullen Hall and put a proposition before us, that we and all Freshmen hereafter wear a cap of some kind during their Freshman year. The purpose of this was to create more college spirit and maintain class distinction. It was voted upon and carried unanimously that we should wear the caps. After interminable discussion we decided to wear a red cap with a white button on top, and the numerals "16" in front. We trust that some such custom will be continued always at A & M.

In athletics we have done exceptionally well. We furnished the Varsity football team with six of its best men: Cooke, Champion, McHenry, Osborne, Rice, and Terry, of these men, Cooke and McHenry winning monograms. There were several others who made the Scrubs and showed up well. In basketball we also did well, furnishing the quintet two men, Terry and Mason, both of whom did star work. Our outlook for baseball and track work is exceptionally bright at this writing. In class football we did not do so well, the Juniors defeating us by the score of 6 to 0, in a hard fought game; but we hope to redeem ourselves in baseball. We hope we will do as well in our four years of college life as we have done in athletics.

The Battalion

The Battalion was organized September 6th, with six full companies and the band. By the untiring efforts of our efficient and highly esteemed Commandant, Captain Peace, and the officers of the Battalion, the new men were soon taught the knowledge requisite to becoming a soldier.

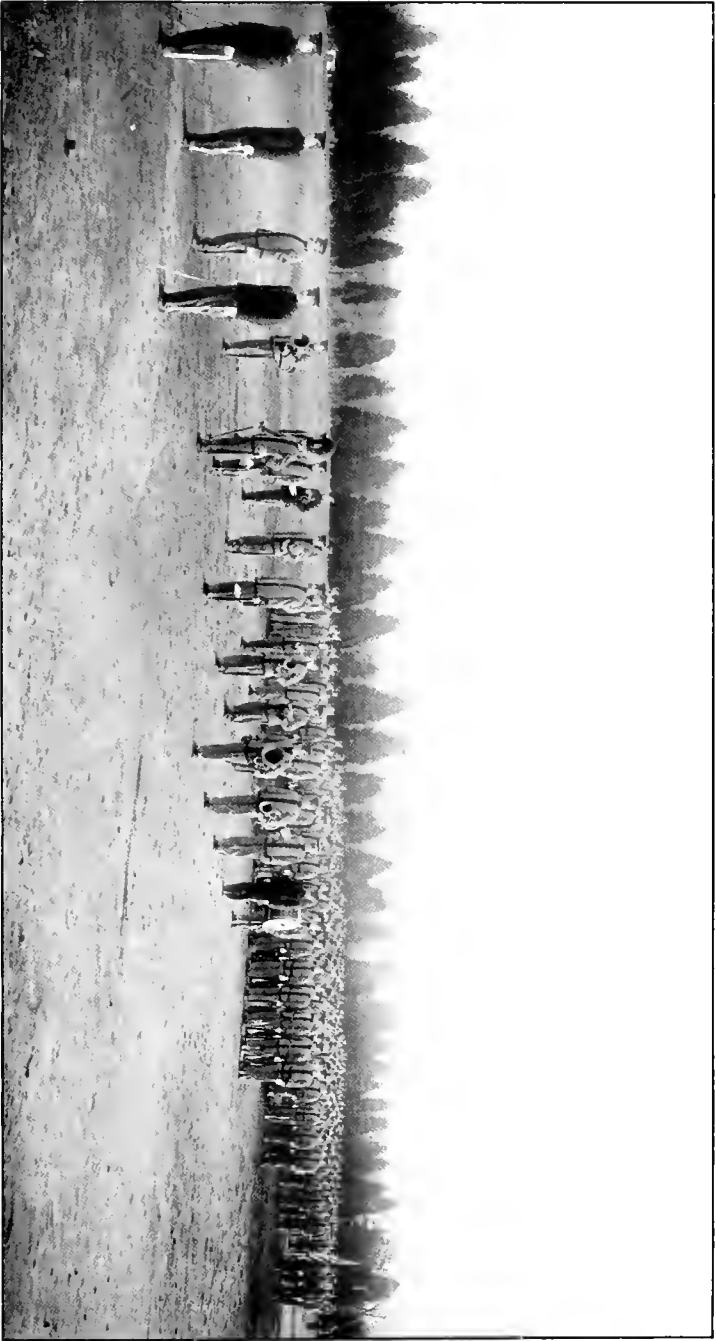

At the beginning of the year the Armory was moved into its new quarters, the basement of Pullen Hall, which is a decided improvement over the old one, in that it is sufficiently large to have gallery practice, also to have delinquency drill indoors when the weather is bad.

During the first two months the old men received instructions in aiming and sighting exercises, gallery and target practice. Drill was held five times per week in order to prepare for the annual competitive drill, which was held November 25th. Captain H. E. Eames, Twenty-eighth Infantry, United States Army, kindly acted as judge for the occasion. The pennant was awarded to Company B, commanded by W. H. Parker, while second honors went to Company C, under the command of H. B. Briggs. The winning company was also given the right of way into the Armory during the entire session. The remainder of the first term was taken up in Battalion and Company drill.

After Christmas, both close and extended order drill were held. Practice in normal attack was given, advance guards sent out and outposts established. The men were also given instruction in the nomenclature of the rifle.

On the 15th of January the Battalion took its place in the Governor's inaugural parade, and it was decided unanimously that the cadets were the best drilled in the parade.

About the middle of February, guard mounting, gallery and target practice were resumed and continued until the annual inspection in April, after which all drill was suspended.

Athletics During the Year 1912

AN A ^{and} M. LINE-UP.

In looking over the records of the A & M athletic teams during the year 1912 there is much that satisfies. While the records of all of the teams do not measure up to the records of the teams of other years, notably football and baseball, still in track the Red and White did better than ever before and in basketball a good start was made. This sport, started in 1910, was this year recognized by The Athletic Council and was put on the same footing with the other teams, thus insuring the speedy development of this popular and valuable branch of athletics.

Sorrow is mixed with pleasure in looking over the records of the season when it is realized that such brilliant athletes as Hartsell, Seifert, Robertson, and Stafford, men who placed A & M athletics on a higher plane than ever before, and men who were leaders while in college, stepped off the athletic field at A & M after having done a good work in the cause of athletics at their Alma Mater.

Right here it isn't amiss to call attention to the fact and record for future athletics at A & M to try to emulate—the wonderful pitching of Robertson, who during the season of 1911 established the world's college strike-out record when he fanned twenty-three Guilford College players on the local field. His record still stands as the greatest performance of its kind ever to fall to the lot of an amateur pitcher. By that one fell swoop "Dave" Robertson won a high place in the Athletic Hall of Fame that will remain secure to him.

Basketball had not discarded its swaddling clothes when the season of 1912 opened and less than a half dozen games were played. The majority of the games

were lost but one notable victory was won from Trinity with heavy odds against A & M.

In track athletics the Red and White of A & M was carried far to the front. More attention than ever before was given to this branch of athletics and the season was closed in a blaze of glory when third place was won by A & M in the South Atlantic Intercollegiate Athletic Association meet held in Baltimore, the few Red and White runners making a great showing against their old rivals.

While the baseball team did not win as many games in 1912 as were won by the team of 1911, the team was by far the best in the State and made a wonderful record on the Northern trip, winning all five games—Lehigh, Washington & Lee, and Catholic University being among the colleges defeated.

The record made by the football team of 1912, while not measuring up to the records of former years, was superior to that of any other college in the State. At the hands of the wonderful Georgetown team A & M suffered the first football defeat on the home grounds in eight years. No other team in fifteen years had piled up such a score against the A & M eleven. But before the season was over that fighting spirit that is the pride of A & M and that has made Red and White teams known and feared all over the South, came to the front and the showing made in the Thanksgiving game against Washington & Lee's almost invincible team was one that every A & M man is proud of.

The naming of the athletic field and the raising of the athletic fee to an amount sufficient to admit students to all athletic contests at A & M, were two of the important events of the athletic year 1912. A just tribute was paid the "Father of Athletics" at A & M when the students unanimously selected the name of Riddick Athletic Field. By increasing the athletic fee a forward step was taken which has already meant much to athletics at A & M.

Considering the records of the four teams for the season of 1912 much is found that causes gratification and justifies the abiding faith A & M men have in their athletic teams.

DIXIE BOWLER.

Who's Who—and Why

Ye who listen with credulity to the whisperings of Wisdom, and pursue with eagerness the phantoms of lore; who expect that age will perform the promises of youth, and that the deficiencies of the day will be supplied by examination—attend to the history of Rastus of Winston Hall.

There once was a professor of the A & M College who discovered a lonely pickaninny, and took care of him and sheltered him. Having confidence in the valor, courage and patriotism of the boy now grown to manhood, a thirsty West Raleighite last fall commissioned him to attend the Thanksgiving game at Norfolk, and charged him above all things to bring back a pint of "red eye." This he endeavored to do, but alas! as he slumbered on the return train at 2:00 a. m., another Senegambian deftly extracted the booze from the inside pocket and forthwith proceeded to load up. This lowborn thief sat down behind, and propped his feet on the back of the seat wherein our protegee rested. In fact, his muddy shoe from time to time tickled the ear of his fellow passenger, who as often protested loudly. Finally, with a snore that rose above the roar of the train, that strange negro sank back into the arms of Morpheus, dead to the world. As he did so his feet shot forward and knocked off the hat of the subject of our sketch. Smarting under the indignity, and still furious at the loss of his bottle, the victim of this outrage sprang to his feet and fairly screamed with anger, "Come here, 'Fesser Clay, an' Mr. Taylor an' "Major" Rowland; come here, all you A & M gemmuns and bear witness to de fac' dat I cuts dis nigger's troat in self-defense." Such is the dynamic character of George Washington McWatermelon O'Johnson Rastus.

Born of humble parents, Rastus at the age of twenty-six has, by his own personal efforts, worked up to the position of second assistant janitor in one of our lesser important buildings. Frugal by nature, he never drinks wine at meals, seldom attends the theatre, and never pays more than \$50 for a suit of clothes. Even a cheap cigar goes a long way with him.

"Rastus," said Professor Clay, "did you smoke that cigar I gave you last month?"

"Yas, sir, 'Fesser, dat sutainly was a fine cigar; I'se still smokin' it."

"What, still smoking it?"

"Yas, sir; you see it's dis way; when I goes to see my gal, I lights up dat cigar; and when I gits dar, I puts it out and puts it in my pocket fur de nex' time. Yas, sir, I'se still smokin' it."

So methodical is he in the performance of his duties that under no circumstances could he be induced to work for more than two hours per day. He simply

will not violate the habit of years. Such economy and fidelity to duty must have its reward. If Rastus does not soon rest in the shade of his own vine and fig tree, it will be because a heartless Building and Loan Association fancies his face less than do those who have long basked in the sunlight of his smile.

The Faculty in Vaudeville

THIRTEEN GREAT ACTS

All New and Showing Some of the World's Greatest Freaks, Brought Together Under the Management of One Man Who Has Been Striving for Years to be Able to Say, "Fellow Citizens, I Have 'em Here."

By College Theatre Press Agent

Coming soon, the greatest acts ever shown in vaudeville and also some of the world's widest known freaks. They will all be shown at the College Theatre and will be well worth the price of admission. Tickets can be secured at the College Book Store. Make your reservations for seats immediately.

In view of the fact that this is the first time that the Faculty Vaudeville Show has ever had the chance of appearing at A & M, I will impose upon your good nature to tell you a few of the little stunts that are performed by these great personages and also a little of their history. So dear, gentle and kind reader, please be patient, as we are about to start on this little story and we hope you will be able to derive therefrom, no, not a formula, but enough amusement to be willing to part with a mere portion of your "tin," to witness the coming events.

As a head liner we place "Daniel Harvey," the smallest man in the country to hold so elevated a position. He with his jokes that Noah laughed at while in the Ark, will try to keep you awake for a few moments, and he will wind up by saying, "Gentlemen, it is for the good of the college and the Legislature is in session."

Following this fair specimen of humanity comes "Wallace Carl," the long distance weed chewer of the world. Gentlemen, it is without prevarication that I make this statement, "Wallace Carl" can, with two plugs of the weed in his face, perform the following stunts: Lecture to Seniors, talk athletics, and refuse to advance money for the scrub team to make a trip, all in one shot, and then can wind up with a double act of taking Coca-Cola and expectorating twenty-seven and one-tenth feet in a hole of one-half inch diameter. good folks, this one sight is well worth the price of the show.

The third act is that of "Tommy," the eternal Borer. This specimen of humanity is one of the original members of the Boring Society, founded in America, and with some of his classy English stories will entertain you for a few moments in his "wishy-washy" way.

Next, good people, we call your attention to the wonder of the age, the man who started a little saying that has been his motto through life, "Promptness is a rare virtue." This man was captured in the past age by chemists and he absorbed enough of this matter to ruin his smelling apparatus. But with all this he is a good

one and can find sometimes a new joke to tell his audience. They run something thusly,—"What will make more noise under a fence than one pig?" (Pardon the outburst of cheers) the answer is not two pigs but a hog.

Now, as we get this far, we will tell you of the greatest act of the age, that of "T Foot." This human was imported from England and by the continuous stumping of his toe on "H's" he has contracted a walk that will place the modern contortionist in one of the worst states of envy ever. Therefore we have to be very careful how this person walks about the streets.

William Tell was some man, but he is not in the same class with "William Hand." This person derived his name from some of his people, why, we know not, because we were not there when this cognomen was attached to him. He is one of the best acts with the show and will tell how he has modernized the use of electricity, with the assistance of "Buz." Their act consists of ringing an electric bell by the use of a battery.

"Howard Ernest" will appear next, and this mechanical personage can perform stunts that are almost human-like. He has been taught to eat, sleep and walk, and also to grade papers, and with a few more years' training he will be able to take his place in the world as a man who, although a piece of machinery, can do all of the work that is required of him.

"Smile and the world smiles with you, frown and it is the same as night." (Shakefellow). The above little song goes with the act of "Sunny Jim," the smiling wonder. This fellow was captured in the woods and brought to civilization, where he was clothed and shod, and has remained so to this day. His smiles are evi-

Editorials

Again we urge you to pay your subscriptions to the *Wau Gau Rac*.

The editors have no apologies to make for the limited amount of reading matter in this the last issue of the *Wau Gau Rac*, for we know that nobody will have little enough sense to read it.

It is with pleasure that we note the fact that the Freshman caps have come, and we congratulate the Freshmen for being Freshmen, so that they can wear these pretty caps.

We do not feel justified in criticising "Charlie" on account of his slick and greasy counter, for it is with hungry stomachs that we approach his joint in search of "hot-dog" or pie.

Owing to the fact that the Legislature is in session, we dare not speak above a whisper for fear they will hear us and thereby cut off our appropriation.

We feel it our duty to censor Neil O'Brien for pointing his finger at our famous Chemical Trio when he rendered his little solo, "No matter how homely, there's no face like your own."

It is with profound sorrow that we note the passage of the Webb Bill. We congratulate our former President for exercising such good judgment when he vetoed this bill. Honorable Senators and Congressmen, you are responsible for the fact that Virginia's revenue is cut short, and to you the manufacturers of private distilleries are indebted.

The Faculty In Vaudeville

(Continued from page 1)

dent always and he is known to have worn one from the time of his birth.

Next, ladies and gentlemen, comes one of the leading features of the bill, that of "Robert L." This personage will prove to you that he is without doubt the most absent minded person in the world. He is known at one time to have been out in the rain and going home instead of getting in bed put his umbrella there and he stood up in the corner of the room all night. This alone will make any person come to the show. He will also try to demonstrate the use of the fourth dimension, but he forgets every time where he left off at the last performance, so he has to "treat them simultaneously" and start all over again.

"Willis Grandy," the military man. This handsome fellow, who has a head of hair of the scarlet hue, will tell of his trials and tribulations while with the people of the Philippines, and he will also vouch for the fact that the remark made by Sherman is in every respect true.

Ah, this act. Well, my dear seat fillers, here is the College Magician. He can make money go farther than any one person in this great show. We allow him to look after the currency and to keep straight the financial arrangements of the Company. He answers to the name of "Arthur Finn," and when pushed very hard can, with his tricks of magic, put Kellar and some of the others in the

shade. He will do the great act of taking a glass of water and making it disappear down his throat and at the same time snap his fingers.

Next we call your undivided attention to "P. G." the Wonder! The man who sits all the time and wears a blank expression and will sometimes say, "Gentlemen, the road to town leads through my office." He is billed with this show as the fat man, though he can do several other stunts, but owing to the limited amount of space we are unable to tell you of his ability. The leading feature of this act is a little remark, "Well, I will write it in the book that way."

Last but not least comes one who cannot be classed with the above, but we carry him as a bodyguard for the freaks. This chocolate colored man answers to the name of "Allen," and when the bell is ringing he is always ready to go an errand for any of the members of the troupe.

With this little introduction, fellow citizens, I hope when this show arrives in our fair city, you will be able to go down in your clothes and have the time of your life and say, "Thanks for the chance, Mr. Manager, I would not take a 'William' for the show."

THE STUDENT

A fool there was and he went to college.
(Even as you and I)

To a place to play and get knowledge,
(We call it a college because we don't care)
But the fool, he spent all of his money there.
(Even as you and I)

Oh! The years we waste and the money we waste,
And the work of our head and hand,
Belongs to the person who has gray hair,
(And we spent the money to beat the band)
But they did not understand.

A fool there was and his time he spent.
(Even as you and I)
Honor and faith and sure intent
(And it wasn't the least what the Faculty meant)
But a fool must follow his natural bent
(Even as you and I)

Oh! The classes we cut and the books we lost,
And the excellent things we planned,
Belongs to the man who did not know why
(And now we know he never knew why)
And did not understand.

The fool was stripped of his foolish pride
(Even as you and I)
Which he might have seen but never tried
(And it is on record that he lied and lied)
So to hide his shame he often got pied
(Even as you and I).

And it isn't the shame and it isn't the blame
That stings like a white hot brand.
It's coming to know as the years roll by
(We did not study and we heave a sigh)
But we did not understand.

LOCALS

There is a report circulating around the campus that a prominent Senior with hair of a reddish hue was found in his room with a book before him one night. The person thus charged wishes to make the statement that such rumors are false, as he was down town.

Several Juniors have been to Chapel of late. We wonder why?

It is reported that "Slick" Gwathmey went to Chapel one morning. He denies the report.

Charlie Hall failed to report to Tyree's Studio Saturday.

The Freshman caps have come.

"Pie" Arthur spent last evening on the campus with his beloved roommate, "Tub."

It is reported by the Textile Seniors that "Windy" Hart tried to turn the elevator of the Realty Building into a "Pay as you enter" car, while in Charlotte.

In the late "Looking pretty contest" Mr. Burfoot, of the Freshman Class, carried off first honor.

To the surprise of the students, "Elsie" Hand arrived on class before the second signal of the whistle.

We regret to know that Ammon suffered a stroke of lockjaw after the Y. M. C. A. house warming.

Great excitement prevailed in the dining hall when it was reported that tender steak was being served. The steward came to the rescue by declaring the charge to be false.

We are glad that the Junior Class has cleared itself of the debt to Giersch's Cafe.

Prof. Pitts, our new Math. bore, is showing up well and the prospects are that he will equal the record of our long since departed friend "Mike."

The steward was wearing a large smile the other day. The excuse, we soon discovered, was that "Rubber" Jeffress was absent from dinner. This is a great saving to the boarding department.

To our deep regret we in deep sorrow do bow our heads and shed an infinite number of tears over the loss of the mother of A. Vinegar, our esteemed companion. The poor lady was discovered dead. The cause—lack of water.

CARDS

BRASS

All grades, from newest shades, to that used in years gone by.

J. B. Steele.

KEEP CLEAN

Soap, all grades, from lye to "Kash me Boka."

Agents: Make big money selling my book on "How to Wear a Cane." I also publish one on noise making.—Smiley Lane.

Now and Then Among the Students

Dr. Roberts: Mr. Spencer, what do you call those animals that chew their eud?

Spencer: "Vegetarians."

Courtship is the wine of life,

We drain the cup with laughter,
 And never learn until too late

That Marriage is "the morning after."

Fearing: Did you ever crank an auto?

Billie Cole: No, but I have been kicked by a mule.

Father: Son, I make you a liberal allowance and think you ought to try to save some.

Son: Oh! I'm saving. I've saved nearly two thousand cigarette coupons.

Dr. Roberts: (On Physiology): Mr. Knight, how many more ribs has a woman than a man?

Knight (Quickly): One!

George Kidd, coming around the corner of the 1911 Dormitory in January, was met squarely in the face by a blow of cold north wind. "Huh," he said indignantly, "where were you last July?"

Ralph Gill: Charlie where are you going?

Charlie Hall: Now or when I die?

Kidd: Church music always makes me yawn.

Clements: It makes good bird dogs howl.

Bart Fearing: Now, "Pie," I am the best looking.

"Pie" Arthur: No, I am. You are nothing but one big freckle.

Bart:

Now "Pie," I am not a star
 There are others more handsome by far,

But my face, I do not mind it,
 For I am behind it.

The people in front get the jar.

McNutt: Mr. Rankin, what joint of the horse's fore leg corresponds to the man's elbow joint?

"Johnnie" Rankin: I don't know Professor. Papa always told me to keep away from joints.

Alpha Zeta: North Carolina Chapter

The Fraternity of Alpha Zeta is designed to bring together those who are committed to higher education in Agriculture. Its aim is to promote good scholarship, good fellowship, and good citizenship. Its object, to induce through the strong tie of brotherly friendship and the stimulus of science, a steady advance in the great art of Agriculture.

Since it was founded, at the Ohio State University, January 10, 1898, the Fraternity of Alpha Zeta has been a signal success. There are now twenty-two chapters in as many colleges and universities of the country. The high standard of the Fraternity is manifested by the scores of its members who, in State and Nation, are reflecting credit on Alpha Zeta in general. To have been admitted to the Fraternity of Alpha Zeta is the greatest honor that a student of Agriculture can win while in college.

The North Carolina Chapter of Alpha Zeta was installed in the North Carolina College of Agriculture and Mechanic Arts in 1903, and was the first chapter in a Southern institution. The chapter is at present in every way a credit to the general fraternity. The members have a high average in scholarship and are leaders in the various college activities.

Civil Engineering Society

In September, 1912, the Seniors in Civil Engineering met and reorganized the Civil Engineering Society in our college. Their purpose was to discuss engineering topics of interest and to try to better understand our classwork. Knowing the necessity of public speaking to a Civil Engineer, it was so arranged that every man might avail himself of practice in this art by delivering orations, lectures, and recitations to the Society. In January, 1913, the Junior Class in Civil Engineering were initiated into the Society. The Society has proved of interest and benefit to each of the members.

Mechanical Engineering Society

The Mechanical Engineering Society was organized in 1907. The members are students in Mechanical Engineering and are elected from the Junior and Senior classes. It is for the purpose of giving the members practice in preparing and delivering papers of interest to Mechanical Engineers. It encourages original research and reveals to the members the value of technical periodicals. The Society also aims to develop the literary side of the Mechanical students, which is often neglected, because the student fails to grasp the important part it plays in his life work as an engineer.

Prof. J. C. McNutt, of the Animal Husbandry Department, conducts a trip to Chicago each year, which offers the Agricultural students an opportunity of going to the International Stock Show, which is held in Chicago annually; this is the greatest stock show in the world. The trip also affords an opportunity of seeing the great prosperity and development of the Middle West.
